North Borneo Sourcebook Jason William Lobel, 2016-01-31 North Borneo Sourcebook seeks to address the lack of available data for the languages of northern Borneo where forty to fifty distinct

languages are spoken in the Malaysian state of Sabah alone While members of the Summer Institute of Linguistics SIL have worked in Sabah for several decades and have published articles on individual languages until now no comprehensive survey of the languages of Sabah had yet been done In addition to the languages native to Sabah also included in this monograph are closely related Southwest Sabah languages spoken in neighboring parts of the Malaysian state of Sarawak the Indonesian province of Kalimantan Utara and Brunei Darussalam The author has included 594 entries with equivalents in each of the forty six languages that represent the linguistic variation in north Borneo along with introductory sections listing the personal pronouns demonstrative pronouns and case markers for each language This sourcebook thus fills a critical need in surveying the languages of a single large area in an island of Southeast Asia Many language communities in this region are endangered and likely to disappear as functioning entities within the next generation or two this book may be the only record we will ever have of their existence Linguists and those with an interest in Austronesian languages will appreciate the breadth and detail that illuminate the linguistic scene in an area where before there had been only pinpoints of light

Approaches to Teaching the History of the English Language Mary Hayes,Allison Paige Burkette,2017 The History of the English Language has been a standard university course offering for over 150 years Yet relatively little has been written about teaching a course whose very title suggests its prodigious chronological geographic and disciplinary scope In the nineteenth century History of the English Language courses focused on canonical British literary works Since these early curricula were formed the English language has changed and so have

Sociolinguistics and Social Theory

Nikolas Coupland, Srikant Sarangi, Christopher N. Candlin, 2014-06-11 The empirical and descriptive strengths of sociolinguistics developed over more than 40 years of research have not been matched by an active engagement with theory Yet over this time social theorising has taken important new turns linked in many ways to linguistic and discursive concerns Sociolinguistics and Social Theory is the first book to explore the interface between sociolinguistic analysis and modern social theory The book sets out to reunite sociolinguistics with the concepts and perspectives of several of the most influential modern theorists of society and social action including Bakhtin Foucault Habermas Sacks Goffman Bourdieu and Giddens In eleven newly commissioned chapters leading sociolinguists reappraise the theoretical framing of their research reaching out beyond conventional limits The authors propose significant new orientations to key sociolinguistic themes including social motivations for language variation and change language power and authority language and ageing language race and class language planning In substantial introductory and concluding chapters the editors and invited discussants reassess the boundaries of sociolinguistic theory and the priorities of sociolinguistic methods Sociolinguistics and Social Theory encourages students and researchers of sociolinguistics to be more reflexively aware and critical of the social bases of their analyses and invites a reassessment of the place sociolinguistics occupies in the social sciences generally

Signs In

Law - A Source Book Jan M. Broekman, Larry Catá Backer, 2014-11-06 This volume provides a critical roadmap through the major historical sources of legal semiotics as we know them today The history of legal semiotics now at least a century old has never been written a non event itself pregnant with semiotic possibility As a consequence its sources are seldom clearly exposed and as word object and meaning change are sometimes lost They reach from an English translation of the 1916 inaugural lecture of the first Chair in Legal Significs at the Amsterdam University via mid 20th century studies on property or

contract to equally fascinating essays on contemporary semiotic problems produced by former students of the Roberta Kevelson Semiotics Roundtable Seminar at Penn State University 2012 and 2013 Together the materials in this book weave the fabric of semiotics and signifies two names for the unfolding of semiotics in law and legal discourse at least until the second half of the 20th century and both of which covered a lawyer's focus on sign and meaning in law The latter is embedded within the cultural imperatives of the civilization that gave these terms meaning and made them an effective tool for the dissection of law its reconstitution as an instrument to be used by the lawyer to advance the interests of her clients and for judges as a means to restructure language as a narrative of law whose power could bend behavior to its strictures Legal semiotics has become an indispensable part of the elite lawyer's toolkit and a fundamental approach to analysis of legal texts Two previous volumes published in 2011 and 2012 explored the conceptual methodological and epistemological progress in the field of legal semiotics the modern forms of semiotics study and the mechanics of meaning making processes by lawyers Yet the great lessons of semiotics requires a focus on the origins of the concepts and frameworks that would become contemporary legal semiotics its origins as an object of the consciousness of meaning making one whose roots as lessons for the oracular conversations of law are expanded in this volume
