New Answers to Old Questions Aaron Connelly, Shona Loong, 2024-06-26 Outside Myanmar the 2021 coup d'état has often been portrayed as the end of a hopeful period for the country. In this Adelphi book however Aaron Connelly and Shona Loong argue that the Aung San Suu Kyi government that preceded it was a false dawn unlikely to fulfil the international community's aspirations for a stable peaceful and strong Myanmar. Instead the movement opposing the 2021 coup holds much greater promise despite the bloody conflict that dominates the news today. Connelly and Loong survey three fundamental relationships that have shaped Myanmar before and after the coup: between the military and the state, between the majority Burmese and ethnic minorities, and between Myanmar and the world, to explain how opposition to the coup has shifted all of them in a more liberal pluralist and cosmopolitan direction.

Routledge Handbook of Southeast Asian Economics Ian Coxhead, 2014-12-17 The Routledge Handbook of Southeast Asian Economics offers new insights into the rapidly developing economies of Southeast Asia. Despite widespread initial deprivation Southeast Asia has achieved and sustained a remarkable rate of growth in the course of which tens of millions have successfully escaped severe poverty. Though the economies of the region vary in many dimensions integration into the wider East Asian network of production and trade is a notable common feature, one that continues a centuries long history of engagement with global trade. A second striking feature is the pace and extent of transformation in the structure of production and in sources of household income in the region, which has undergone remarkably rapid industrialization and urban growth. However the search for sustained and sustainable growth through and beyond middle income continues to confront pressing economic and policy challenges. This Handbook offers a timely and comprehensive overview of Southeast Asian economic development. Organized according to the logic of chronological and thematic unity it is structured in these sections: Growth and development over the long term; Food, agriculture and natural resources; Trade, investment and industrialization; Population, labor and human capital; Poverty and political economy; Twenty first century challenges. This original Handbook, written by experts in their fields, is unique in the breadth and depth of its coverage. Its forward looking perspective renders it relevant both now and in the future. This advanced level reference work will be essential reading for students, researchers and scholars of Asian Studies, Economics and Southeast Asian studies.
