**Environmental Politics in the Middle East** Harry Verhoeven, 2018-09-01 This book investigates how ecology and politics meet in the Middle East and how those interactions connect to the global political economy Through region wide analyses and case studies from the Arabian Peninsula the Gulf of Aden the Levant and North Africa the volume highlights the intimate connections of environmental activism energy infrastructure and illicit commodity trading with the political economies of Central Asia the Horn of Africa and the Indian subcontinent The book s nine chapters analyze how the exploitation and representation of the environment have shaped the history of the region and determined its place in global politics It argues that how the ecological is understood instrumentalized and intervened upon is the product of political struggle deconstructing ideas and practices of environmental change means unravelling claims of authority and legitimacy This is particularly important in a region frequently seen through the prism of environmental determinism where ruling elites have imposed authoritarian control as the corollary of environmental crisis This unique and urgent collection will question much of what we think we know about this pressing issue      *Geofusion: Mapping Of The 21st Century* Norbert Csizmadia, 2020-03-26 Geofusion is an exciting journey around the main issues of the 21st century This is a book with roadmaps that show the complexity of our world the interconnections between places people schools of thoughts and disciplines Starting with a geographical frame of reference readers are taken through the global geo economic trends and likely future scenarios as well as the driving forces of the new world economy The book points to the importance of cities as the power centers for the multidimensional global network of the 21st century Geofusion is a thought provoking guidebook to our interconnected world      *Fanon, i ek, and the Violence of Resistance* Zahi Zalloua, 2025-06-26 In a novel pairing of anti colonial theorist Frantz Fanon with Marxist Lacanian philosopher Slavoj i ek Zahi Zalloua explores the ways both thinkers expose the violence of political structures This inventive exploration advances an anti racist critique describing how ontology operates in a racial matrix to produce some human bodies that count and others deemed not quite or non human that do not For Fanon and i ek the violence of ontology must be met with another form of violence a revolutionary violence that delegitimizes the logic of the symbolic order and troubles its collective fantasies Whereas Fanon begins his challenge to ontology by exposing its historical linkages to Europe s destructive imperialist procedures before proceeding to stretch Marxism along with psychoanalysis to account for the crushing neo colonial situation i ek premises his work on the refusal to accept the totality of ontology Because of these different points of intervention Fanon and i ek together offer a powerful and multifaceted assessment of the liberal anti racist paradigm whose propensity for identity politics and aversion to class struggle silence the cry of the dispossessed and foreclose radical change Avoiding contemporary separatist temptations decoloniality and Afropessimism and breaking with a non violent sentimentalist futurology that announces more of the same Fanon and i ek point in a different direction one that eschews identitarian thought in favor of a collective struggle for

freedom and equality      *Inflation Targeting and Central Banks* Joanna Niedźwiedzińska, 2021-07-28 Over the last three decades inflation targeting IT has become the most popular monetary policy framework among larger economies At the same time its constituting features leave room for different interpretations translating into various central banks institutional set ups Against this backdrop this book investigates the importance of institutional arrangements for policy outcomes In particular the book answers the question of whether there are significant differences in IT central banks institutional set ups and if yes whether they influence the ability of monetary authorities to meet their policy goals The book examines around 70 aspects related to independence accountability and transparency of 42 IT central banks over the last 30 years Based on the analysis it can be concluded that the quality of the institutional set ups materially affects monetary policy effectiveness In fact a visible improvement of institutional arrangements resulting from pursuing an inflation targeting strategy can be treated as its lasting contribution to central banking Thus despite the recent critique of the framework its prospects continue to be rather favourable Overall for the advocates of inflation targeting the findings of the book can be seen as identifying the sources of IT strengths while for IT opponents they may be viewed as indicating which elements of IT institutional set ups should be kept even if the need to replace this strategy with another regime will indeed result in a change Given the role monetary policy plays within the economy such knowledge may have significant implications Therefore the book will be relevant for different audiences including scholars and researchers of monetary economics and monetary policy and will be essential reading for central banks already pursuing an IT strategy or those preparing to adopt one Importantly the book includes supplementary indices of proposed institutional arrangements that assess a range of aspects related to IT central bank s independence accountability and transparency Readers thus have access to the author s full database which covers individual indices for all monetary authorities investigated across the given period of analysis      **The Academic Trumpists**

David L. Swartz, 2024-08-01 Matt Dawson and David L Swartz discuss *The Academic Trumpists* on the New Books in Sociology podcast Reviewed by Scott McLemee in Inside Higher Ed Donald Trump wants to dismantle the Department of Education Some professors would welcome it by David L Swartz in Salon There has been an outpouring of research on populist conservatism since the advent of the Trump presidency and extreme right movements in Europe Much less studied however is the growing political conservatism in the American academy and how it relates to populist sentiment *The Academic Trumpists* addresses a gap in the research literature by looking at the impact of Trumpism on conservative faculty It compares 109 professors who publicly support Trump to 89 conservative professors who oppose Trump All 198 function as public intellectuals who advocated publicly their views Drawing on recent research in the sociology of intellectuals and Pierre Bourdieu s analytical field perspective this book offers a fielding political identities and practices framework to show how these two groups of professors Trumpists and anti Trumpists differ in where they teach their intellectual orientations their scholarly productivity their political rationales where they network with think tanks scholarly professional associations

and government agencies and their stances on key controversies surrounding the Trump presidency Covid 19 the two impeachments the November 2020 election lost and the January 6 mob assault on the United States Capitol The academic Trumpists embrace the right wing populist wave mobilized by Trump and the conservative critics resist this move This polarization of views between these two groups of conservative professors is enduring and rooted in two distinct social networks that connect their positions in the academic field to affiliations with conservative think tanks that reinforce their respective political identities and radical right wing anti establishment thinking in America more generally This book will appeal to readers interested in the politics of higher education the sociology of intellectuals political sociology and research on conservative and right wing populism politics in America today When Things Don't Fall Apart Ilene Grabel,2019-08-06

An account of the significant though gradual uneven disconnected ad hoc and pragmatic innovations in global financial governance and developmental finance induced by the global financial crisis In When Things Don't Fall Apart Ilene Grabel challenges the dominant view that the global financial crisis had little effect on global financial governance and developmental finance Most observers discount all but grand systemic ruptures in institutions and policy Grabel argues instead that the global crisis induced inconsistent and ad hoc discontinuities in global financial governance and developmental finance that are now having profound effects on emerging market and developing economies Grabel's chief normative claim is that the resulting incoherence in global financial governance is productive rather than debilitating In the age of productive incoherence a more complex dense fragmented and pluripolar form of global financial governance is expanding possibilities for policy and institutional experimentation policy space for economic and human development financial stability and resilience and financial inclusion Grabel draws on key theoretical commitments of Albert Hirschman to cement the case for the productivity of incoherence Inspired by Hirschman Grabel demonstrates that meaningful change often emerges from disconnected erratic experimental and inconsistent adjustments in institutions and policies as actors pragmatically manage in an evolving world Grabel substantiates her claims with empirically rich case studies that explore the effects of recent crises on networks of financial governance such as the G 20 transformations within the IMF institutional innovations in liquidity support and project finance from the national to the transregional levels and the rebranding of capital controls Grabel concludes with a careful examination of the opportunities and risks associated with the evolutionary transformations underway Collapse and Revival Mr.Ayhan Kose,Mr.Marco E. Terrones,2015-12-16 As the debates about the recent global recession and the subsequent recovery have clearly shown our understanding of these questions has been very limited This comprehensive text puts the latest global recession and ongoing recovery in perspective With the support of a companion website and DVD we have created several multimedia tools to help understand the basics Inventing the Future Nick Srnicek,Alex Williams,2015-11-17 This major new manifesto offers a clear and compelling vision of a postcapitalist society and shows how left wing politics can be rebuilt for the 21st century Mark Fisher author of *Capitalist*

Realism Neoliberalism isn't working Austerity is forcing millions into poverty and many more into precarious work while the left remains trapped in stagnant political practices that offer no respite *Inventing the Future* is a bold new manifesto for life after capitalism Against the confused understanding of our high tech world by both the right and the left this book claims that the emancipatory and future oriented possibilities of our society can be reclaimed Instead of running from a complex future Nick Srnicek and Alex Williams demand a postcapitalist economy capable of advancing standards liberating humanity from work and developing technologies that expand our freedoms This new edition includes a new chapter where they respond to their various critics      **Development and Social Change** Philip McMichael, Heloise Weber, 2024-12-09

*Development and Social Change* explores the historical socio political and ecological aspects of development The Eighth Edition critically engages with the concept of development tracing its roots and examining its implications in the contemporary world Authors Philip McMichael and Heloise Weber use case studies and examples to help describe a complex world in transition Students are encouraged to see global development as a contested historical project By showing how development stems from unequal power relationships between and among peoples and states often with planet threatening environmental outcomes it enables readers to reflect on the possibilities for more just social ecological and political relations

**Leadership in War and Peace** Joan Johnson-Freese, 2025-03-31 This book offers a gendered perspective on leadership in war and peace considering leadership in its complexity and presenting a practical examination of both leadership successes and failures The work challenges readers to think through and discuss specific aspects of leadership including how and why leadership diversity matters and the ethical challenges presented by the revolving door of the military industrial complex Further leaders responsible for decisions involving war and peace must be able to understand appreciate and communicate effectively with everyone they work with and have a repertoire of leadership styles to use depending on context The book represents an excellent tool for developing such skills as it uniquely considers leadership through both male and female lenses along with the experiences and perspectives of multiple military government and industry leaders interviewed by the author making it both relatable and informative This book will be of much interest to students of gender studies leadership studies defense studies and military studies in general as well as military and security practitioners      *Financial*

*Underpinnings of Europe's Financial Crisis* Nina Eichacker, 2017-10-27 This book analyzes how financial liberalization affected the development of the financial crisis in Europe with particular attention given to the ways in which power asymmetries within Western Europe facilitated financial liberalization and distributed the costs and gains from it The author combines institutional narrative analysis with empirical surveys and econometrics as well as country level studies of financial liberalization and its consequences before and after the 2008 Global Financial Crisis      Law, Economics, and Conflict

Kaushik Basu, Robert C. Hockett, 2021-08-15 In *Law Economics and Conflict* Kaushik Basu and Robert C Hockett bring together international experts to offer new perspectives on how to take analytic tools from the realm of academic research

out into the real world to address pressing policy questions As the essays discuss political polarization regional conflicts climate change and the dramatic technological breakthroughs of the digital age have all left the standard tools of regulation floundering in the twenty first century These failures have in turn precipitated significant questions about the fundamentals of law and economics The contributors address law and economics in diverse settings and situations including central banking and the use of capital controls fighting corruption in China rural credit markets in India pawnshops in the United States the limitations of antitrust law and the role of international monetary regimes Collectively the essays in Law Economics and Conflict rethink how the insights of law and economics can inform policies that provide individuals with the space and means to work innovate and prosper while guiding states and international organization to regulate in ways that limit conflict reduce national and global inequality and ensure fairness Contributors Kaushik Basu Kimberly Bolch University of Oxford Marieke Bos Stockholm School of Economics Susan Payne Carter US Military Academy at West Point Peter Cornelisse Erasmus University Rotterdam Ga l Giraud Georgetown University Nicole Hassoun Binghamton University Robert C Hockett Karla Hoff Columbia University and World Bank Yair Listokin Yale Law School Cheryl Long Xiamen University and Wang Yanan Institute for Study of Economics WISE Luis Felipe Lopez Calva UN Development Programme C lestin Monga Harvard University Paige Marta Skiba Vanderbilt Law School Anand V Swamy Williams College Erik Thorbecke Cornell University James Walsh University of Oxford Contributors Kimberly B Bolch Marieke Bos Susan Payne Carter Peter A Cornelisse Ga l Giraud Nicole Hassoun Karla Hoff Yair Listokin Cheryl Long Luis F Lopez Calva C lestin Monga Paige Marta Skiba Anand V Swamy Erik Thorbecke James Walsh

**Elgar Encyclopedia of Financial Crises** Sara Hsu, 2023-12-11 Beginning with the 2008 global crisis in the United States and particularly after the COVID 19 pandemic shook economies around the world academics practitioners and other experts have become increasingly sensitised to the potential for financial and economic fragility to result in a systemic breakdown Presenting a synopsis of lessons learnt from financial crises arising out of the 19th 20th and 21st centuries each entry examines a unique past issue to help to develop future outcomes operating as a touchstone for further research

**A New Spirit of Capitalism** The Trilateral Commission, 2022-08-05 Capitalism represents the greatest engine of material well being that the world has ever seen But scepticism about its viability has grown across the political spectrum on the back of rising inequalities climate change and digital disruptions This book joins the debate about the crisis of capitalism not by blindly defending the system but by advocating concrete proposals to put it on a more socially and environmentally sustainable path Too often conversations about the future of capitalism consider it as a homogeneous socio economic system whose features vary little from one location to another this commonly leads to one size fits all recommendations to address capitalism s flaws The contributors to this book by contrast look at the transition needed from the perspective of capitalism s multi faceted nature in response to challenges including the green transition the digital revolution and spiralling inequalities These present difficult trade offs in terms of growth efficiency and stability which each capitalist model will solve differently

**The New Power Elite** Alan Shipman, June Edmunds, Bryan Turner, 2018-04-13 Elites have always ruled wielding inordinate power and wealth taking decisions that shape life for the rest In good times the 1% can hide their privilege or use growing social mobility and economic prosperity as a justification When times get tougher there s a backlash So the first years of the twenty first century a time of financial crashes oligarchy and corruption in the West persistent poverty in the south and rising inequality everywhere have brought elites and establishments under unprecedented fire Yet those swept to power by this discontent are themselves a part of the elite attacking from within and extending rather than ending its agenda The New Power Elite shows how major political and social change is typically driven by renegade elite fractions who co opt

or sideline elites traditional enemies It is the first book to combine the politics economics sociology and history of elite rule to present a compact comprehensive account of who s at the top and why we let them get there

**Five Thousand Years of Monarchy** Michael Arnheim,2025-09-03 Offers a sweeping entertaining journey through the real power structures of world history Five Thousand Years of Monarchy challenges everything you thought you knew about political history With wit clarity and a deep command of historical detail Michael Arnheim reframes five millennia of global governance through a strikingly original lens the idea that every government from ancient Sumer to modern China is either a monarchy or an oligarchy regardless of its name or apparent ideology This provocative framework reveals insights into some of history s greatest puzzles and personalities from the Roman emperors to Castro s Cuba Augustus to Queen Victoria and from Louis XVI s missed opportunity to the untold powers of King Philip II Drawing on lively anecdotes surprising facts and colorful historical vignettes Arnheim brings the power struggles of the past vividly to life Why was Imperial China more stable than any modern democracy Could World War I have been avoided by more autocracy And why are aristocracies more hostile to monarchs than revolutions ever were Engaging opinionated and highly readable Five Thousand Years of Monarchy offers a powerful reminder that what really matters in politics isn t titles or constitutions it s who holds the power and how Presenting a bold and original reinterpretation of world history through the lens of power structure Five Thousand Years of Monarchy Distills all governments ancient and modern into just two essential types monarchy or oligarchy Provides a global scope covering rulers and regimes from every major civilization Reveals little known historical facts such as King Philip II of Spain s reign as King of England Offers original counterintuitive takes on major events such as the French Revolution and World War I Explores the surprising longevity and success of the Roman and Chinese empires Challenges conventional narratives and political assumptions with evidence based analysis Written in an engaging accessible and often humorous style Five Thousand Years of Monarchy is ideal for general readers with an interest in history politics or leadership as well as students and instructors in History Classics and Political Science

Overripe Economy Alan Nasser,2018-06-20 From industrialisation to the present day Overripe Economy is a genealogy of the emergence of a finance ridden authoritarian austerity plagued American capitalism This panoramic political economic history of the country surveys the ruthlessly competitive capitalism of the nineteenth century the maturation of industrial capitalism in the 1920s the rise and fall of capitalism s Golden Age and the ensuing decline towards the modern era Alan Nasser shows why the emergence of the persistent austerity of financialised neoliberal capitalism is the natural outcome of mature capitalism s evolution revealing both the key structural and political vulnerabilities of capitalism itself and points towards the kind of system that can transcend it At the centre of the argument is capitalism s ultimatum either a new normal of persistent austerity declining democracy and a privatised state or a polity and economy characterised by an economic democracy that can ensure both higher wages and a shorter working week

No Ordinary Disruption Richard Dobbs,James Manyika,Jonathan

Woetzel,2016-08-30 Our intuition on how the world works could well be wrong We are surprised when new competitors burst on the scene or businesses protected by large and deep moats find their defenses easily breached or vast new markets are conjured from nothing Trend lines resemble saw tooth mountain ridges The world not only feels different The data tell us it is different Based on years of research by the directors of the McKinsey Global Institute No Ordinary Disruption The Four Forces Breaking all the Trends is a timely and important analysis of how we need to reset our intuition as a result of four forces colliding and transforming the global economy the rise of emerging markets the accelerating impact of technology on the natural forces of market competition an aging world population and accelerating flows of trade capital and people Our intuitions formed during a uniquely benign period for the world economy often termed the Great Moderation Asset prices were rising cost of capital was falling labour and resources were abundant and generation after generation was growing up more prosperous than their parents But the Great Moderation has gone The cost of capital may rise The price of everything from grain to steel may become more volatile The world s labor force could shrink Individuals particularly those with low job skills are at risk of growing up poorer than their parents What sets No Ordinary Disruption apart is depth of analysis combined with lively writing informed by surprising memorable insights that enable us to quickly grasp the disruptive forces at work For evidence of the shift to emerging markets consider the startling fact that by 2025 a single regional city in China Tianjin will have a GDP equal to that of the Sweden of that in the decades ahead half of the world s economic growth will come from 440 cities including Kumasi in Ghana or Santa Carina in Brazil that most executives today would be hard pressed to locate on a map What we are now seeing is no ordinary disruption but the new facts of business life facts that require executives and leaders at all levels to reset their operating assumptions and management intuition
