A History of the Bible John Barton, 2020-08-04 A literary history of our most influential book of all time by an Oxford scholar and Anglican priest. In our culture the Bible is monolithic. It is a collection of books that has been unchanged and unchallenged since the earliest days of the Christian church. The idea of the Bible as Holy Scripture, a non-negotiable authority straight from God, has prevailed in Western society for some time. And while it provides a firm foundation for centuries of Christian teaching, it denies the depth, variety, and richness of this fascinating text. In *A History of the Bible*, John Barton argues that the Bible is not a prescription to a complete, fixed religious system but rather a product of a long and intriguing process which has inspired Judaism and Christianity but still does not describe the whole of either religion. Barton shows how the Bible is indeed an important source of religious insight for Jews and Christians alike yet argues that it must be read in its historical context, from its beginnings in myth and folklore to its many interpretations throughout the centuries. It is a book full of narratives, laws, proverbs, prophecies, poems, and letters, each with their own character and origin stories. Barton explains how and by whom these disparate pieces were written, how they were canonized, and which ones weren't, and how they were assembled, disseminated, and interpreted around the world, and importantly, to what effect. Ultimately, *A History of the Bible* argues that a thorough understanding of the history and context of its writing encourages religious communities to move away from the Bible's literal wording, which is impossible to determine, and focus instead on the broader meanings of scripture.

*Shekinah Unveiled* John Whitman, 2018-07-05 Many Christians believe and have been taught that the bride of Christ is the church, and this presupposition is widely held by scholars, ministers, and laity alike as though it were a biblical precept. Yet this view actually owes its origins to pagan heresy and mysticism that infiltrated the church over the centuries. In fact, the scriptures tell us who Jesus will marry, and it is neither the Christian church nor Israel. *Shekinah Unveiled* examines and irrevocably dismantles the ages-old traditions that maintain that the church is the bride of Christ and that Israel was Yahweh's wife. Author and theologian John Whitman proves from scripture who the true bride of Christ and the wives of Yahweh are, and he explains why it matters to know the identity of the bride of Christ. Knowledge of the true identity of the

bride of Christ affects multiple core doctrines of faith: the imago Dei, marriage, sexuality and the family, sin, Christology, ecclesiology, eschatology, judgment, bridal theology and theology proper. And because the latter is itself the bedrock upon which not only systematic theology but each of these other attendant doctrines are founded, the very heart of Christianity is affected by knowing the identity of Christ's bride. *The Philosophy of Forgiveness: Volume III* Gregory L. Bock, 2019-06-10

*The Philosophy of Forgiveness Volume III* Forgiveness in World Religions is a collection of essays that explores the philosophy of forgiveness in different religions including Judaism, Christianity, Islam, Hinduism, Buddhism and Confucianism. Each chapter scours one of these religions for insights on the concept of forgiveness, asking questions such as whether forgiveness is a virtue, whether it is conditional, whether God has standing to forgive and whether it is permissible not to forgive some extreme wrongs. In some of the chapters, the concept of forgiveness in one religion is compared with that in another. In other chapters, the ideas of different traditions within a religion are compared and contrasted. Also, some chapters compare a religious concept to the views of a philosophical figure such as Aristotle, Kant or Derrida. The contributors to the volume come from various cultural and religious backgrounds and from different disciplines such as philosophy, religious studies and psychology. The collection is written for scholars, graduate students and upper division undergraduate students interested in forgiveness or comparative religious philosophy. **Measure of People and Space Interactions in the Built**

**Environment** Abubakar Danladi Isah, Isa Bala Muhammad, 2019-02-28 This book is an edited collection of seven chapters on the theme of people and space interactions in different settings. Using a variety of problems, it showcases a rich set of solutions to the global challenges of functional, sustainable and responsive habitats in both urban and rural environments. The book deals with cultural landscapes, sustainable housing, settings, the environment and human response, spatial epidemiology, neighbourhood and health and the subjectivity/objectivity continuum in man-environment research. The studies apply a variety of social research methods and strategies relevant to the study of human interaction with its environment. Collectively, they serve as templates for direction in modern social science research methodology built on evidence-based scientific inquiry of the built environment. It can guide both young and seasoned researchers in considering appropriate responses to various social research problems, including assessing various options in research process innovation. A recurrent lesson from the individual studies and significant contribution of the volume is that each research endeavor needs to be based on a firm philosophical grounding, as this goes a long way in determining the type of data to be collected and the ways that they are analysed and interpreted. Taking a cross-disciplinary perspective, this edited collection should be of interest to scholars of geography, anthropology, sociology, epidemiology, urban planning, architecture and, above all, environment behaviour studies.
