which is good The fear of death was lost when our scientists showed us how to live until we grew weary of life But I am digressing an old man s failing The Forgotten Planet was not always so named The name that it once bore had been as every child knows stricken from the records actual and mental of the Universe It is well that evil should not be remembered But in order that this history may be clear in the centuries to come my record should go back to beginnings So far as the Universe is concerned the history of the Forgotten Planet begins with the visit of the first craft ever to span the space between the worlds the crude adventuresome Edorn whose name as well as the names of the nine Zenians who manned her occupy the highest places in the roll of honor of the Universe Ame Baove the commander and historian of the Edorn made but brief comment on his stop at the Forgotten Planet I shall record it in full We came to rest upon the surface of this the fourth of the planets visited during the first trip of the Edorn eighteen spaces before the height of the sun We found ourselves surrounded immediately by vast numbers of creatures very different from ourselves and from their expressions and gestures we gathered that they were both curious and unfriendly Careful analysis of the atmosphere proved it to be sufficiently similar to our own to make it possible for us to again stretch our legs outside the rather cramped quarters of the Edorn and tread the soil of still another world No sooner had we emerged however than we were angrily beset by the people of this unfriendly planet and rather than do them injury we retired immediately and concluded our brief observations through our ports The topography of this planet is similar to our own save that there are no mountains and the flora is highly colored almost without exception and apparently quite largely parasitical in nature The people are rather short in stature with hairless heads and high foreheads Instead of being round or oval however the heads of these people rise to a rounded ridge which runs back from a point between and just above the eyes nearly to the nape of the neck behind They give evidence of a fair order of intelligence but are suspicious and unfriendly From the number and size of the cities we saw this planet is evidently thickly populated We left about sixteen spaces before the height of the sun and continued towards the fifth and last planet before our return to Zenia
