The Last Trade:

The Last Trade James Conway, 2013-02-05 James Conway has written the corporate thriller for our age an age when the power of new media and the hunger of Wall Street converge to form a deadly entity capable of bringing the global economy to its knees Drew Havens made a killing for the Rising Fund which thanks to his prognostications was the only hedge operation to anticipate and capitalize on the mortgage crisis of 2008 Havens sees things others can't from the collapse of the American real estate market to the multibillion dollar rise of his ruthless and charismatic boss Havens is rich beyond his dreams but his work has cost him his marriage And now it may cost him his life It starts with the brutal murder of his young protégé and over the course of six days six other brokers around the world each killed after executing a trade linked to the Rising Fund And as the violence escalates to an international level Havens frantically tries to construct a model that will reveal the catastrophic event that only he can see coming and confirm that his boss and the Rising Fund are at the center of it *The Dublin Magazine*, 1840 [The Econometrics of Sequential Trade Models](#) Stefan Kokot, 2012-08-27 The present study has been accepted as a doctoral thesis by the Department of Economics of the Johann Wolfgang Goethe University in Frankfurt am Main It grew out from my five year long participation in two research projects Econometric analysis of transaction intensity and volatility on financial markets and Microstructure on financial markets that were both conducted by the chair of Statistics and Econometrics Empirical Economic Research at the Department of Economics and Business Administration Johann Wolfgang Goethe University in Frankfurt am Main and financed by the state of Hessen During this time I have benefitted from many people First and foremost I would like to thank my thesis supervisor Prof Dr Reinhard Hujer for initiating and supporting my studies with great encouragement I am also very grateful to Prof Dr Christian Schlag for acting as the second thesis supervisor Furthermore I wish to thank Prof Dr Joachim Grammig who introduced me to the topics covered in this study in the first place and helped me to sharpen my views on econometrics and financial market microstructure theory through many discussions and also through his willingness to work with me on several related studies
