Review of Legal Aid Great Britain: Parliament: House of Commons: Constitutional Affairs Committee, 2007-05 This report examines the Government's proposals for radical reform of the Legal Aid system as set out in the Government's White Paper Cm 6993 ISBN 9780101699327 published in November 2006 These proposals follow on from three other documents i the Government's long term strategy for legal aid A fairer deal for legal aid published in July 2005 Cm 6591 ISBN 9780101659123 ii the recommendations of the independent review of legal aid procurement undertaken by Lord Carter of Coles details are available at www.legalaidprocurementreview.gov.uk/publications.htm published in July 2006 and iii a consultation paper jointly issued by the Department for Constitutional Affairs and the Legal Services Commission details available at www.dca.gov.uk/consult/legalaidsf/sustainablefuture.htm published in July 2006 The Government plans to change the basis on which Legal Aid is to be procured by introducing a transitional system of fixed and graduated fees for cases rather than payment on an hourly basis as is the practice now in many areas of legal aid work as a way of preparing for full competitive tendering for Legal Aid contracts by solicitors Overall the Committee finds that while it supports the fundamental aims of the reforms and recognises that there is an urgent necessity to limit Legal Aid expenditure the Government has introduced these plans too quickly in too rigid a way and with insufficient evidence *An Introduction to Comparative Legal Models of Criminal Justice* Cliff Roberson, Dilip K. Das, 2008-06-11 While in Plato's time there may have been some truth to his belief that there can only be one single justice and one single law such is not the case today Criminal justice systems vary widely across the world in their approaches to the problem of crime Bringing together the collective wisdom of Cliff Roberson and Dilip K Das two world **Criminology** Anthony Walsh, Cody Jorgensen, 2017-01-20 Criminology The Essentials Third Edition by Anthony Walsh and Cody Jorgensen introduces students to major theoretical perspectives and criminology topics in a concise easy to read format This straightforward overview of the major subject areas in criminology still thoroughly covers the most up to date advances in theory and research In the new full color Third Edition special features have been added to engage the reader in thinking critically about concepts in criminology **Ethico-Legal Aspect of AI-driven Driverless Cars** Sadaf Fahim, 2024-08-23 This book is a comparative study of the laws and regulations involving legal and ethical issues related to Artificial Intelligence AI in particular for self driving cars or autonomous vehicles AVs It identifies analyzes and points out such issues via a study of laws and regulations in India Germany and California determining the legal liabilities of designer developer programmer manufacturer producer users or AI in the case of AVs AV technology is being touted as one that is poised to bring revolution in the mobility ecosystem by lessening the number of accidents and by providing other benefits such as potential to reduce traffic increase safety and mobility lower energy usage and generate free time Despite having such a potential to shape and transform the future and involvement of tech giants like Google Amazon Facebook and Microsoft regulations around AI and AVs are still on the drawing board stage in many countries as they grapple on how to address this issue which has both local and global players involved and affects both local

and global populace The book studies and compares the existing and evolving regulations in three different regions to bring out the lacunae loopholes and best practices It highlights when AI deserves legal personhood and when it requires to be granted legal standing It also points out the civil and criminal legal liabilities arising when AV is involved in an accident and the ethical issues involved in the deployment of AI The book goes beyond new regulations to analyze whether challenges and problems arising from AI technology can be addressed within existing civil and criminal laws procedural and substantive law or whether a sui generis law on AI technology is required The analysis and the results showcased here would be highly useful for multi disciplinary research on the topic Regulators of both industry and governance would find the contents invaluable in getting a broader picture of the issues and concerns around this topic along with policy makers would be able to come up with more effective regulations on AI and AVs

Exploring the 'Legal' in Socio-Legal Studies David Cowan, Daniel Wincott, 2019-03-01 Socio legal studies have had an ambivalent relationship with the legal one of its defining aspects but at the same time one that the discipline has sought to transcend or even leave behind While socio legal studies benefit hugely from the insights methods and theories of other social science and humanity disciplines the contributions to Exploring the Legal in Socio Legal Studies illustrate the value of a focus on the legal The chapters in this book combine traditional legal

materials and analyses with other ways of engaging empirically with the legal. They illustrate the rich potential of the legal as a site both for theoretical and methodological reflection and for case study analysis. Taken as a whole, this volume demonstrates that methodological discussion is most helpful when rooted in empirical cases and that the best case studies also help us to develop our methodologies. Bringing methodology and empirical analysis together offers an opportunity to reflect on socio-legal studies and develop the discipline in productive new directions.
