Transience and Permanence in Urban Development John Henneberry, 2017-03-21 Temporary urban uses innovative ways to transform cities or new means to old ends The scale and variety of temporary or meanwhile or interim urban uses and spaces has grown rapidly in response to the dramatic increase in vacant and derelict land and buildings particularly in post industrial cities To some this indicates that a paradigm shift in city making is underway To others alternative urbanism is little more than a distraction that temporarily cloaks some of the negative outcomes of conventional urban development However rigorous theoretically informed criticism of temporary uses has been limited The book draws on international experience to address this shortcoming from the perspectives of the law sociology human geography urban studies planning and real estate It considers how time and the way that it is experienced informs alternative perspectives on transience It emphasises the importance for analysis of the structural position of a temporary use in an urban system in spatial temporal and socio cultural terms It illustrates how this position is contingent upon circumstances What may be deemed a helpful and acceptable use to established institutions in one context may be seen as a problematic unacceptable use in another What may be a challenging and fulfilling alternative use to its proponents may

lose its allure if it becomes successful in conventional terms Conceptualisations of temporary uses are therefore mutable and the use of fixed or insufficiently differentiated frames of reference within which to study them should be avoided It then identifies the major challenges of transforming a temporary use into a long term use These include the demands of regulatory compliance financial requirements levels of expertise and so on Finally the potential impacts of policy on temporary uses both inadvertent and intended are considered The first substantive critical review of temporary urban uses *Transience and Permanence in Urban Development* is essential reading for academics policy makers practitioners and students of cities worldwide A Hybrid World Sadiri Joy Tira, Juliet Lee Uytanlet, 2020-05-15 Linking Blending Intermixing with Divine Purpose People are on the move As individuals and people groups are constantly migrating the unreached have become part of our communities This reality provides local Christ followers with the challenge and opportunity of navigating both the global diaspora and mixed ethnicities A Hybrid World is the product of a global consultation of church and mission leaders who discussed the implications of hybridity in the mission of God The contributors draw from their collective experiences and perspectives explore emerging concepts and initiatives and ground them in authoritative Scripture for application to the challenges that hybridity presents to global missions This book honestly wrestles with the challenges of ethnic hybridity and ultimately encourages the global church to celebrate the opportunities that our sovereign and loving God provides for the world's scattered people to be gathered to himself *Performing the Buraku* Flavia Cangià, 2013 People labelled as Buraku min in Japan are usually described as the descendants of pre modern occupational groups who were engaged in socially polluting tasks like leather work meat packing street entertainment and drum making *Performing the Buraku* explores representations of the buraku issue by community and local activism in contemporary Japan with a special focus on performances and museum exhibitions Ethnic Groups of North, East, and Central Asia James B. Revolutionary theories from Marx onward have often struggled to unite the psychological commitments of individuals understood as ideological with the larger ethical or political goals of a social movement As a psychiatrist social theorist and revolutionary Frantz Fanon attempted to connect the ideological and the political Fanon s work gives both a psychological explanation of the origins of ideology and seeks to restore the individual to autonomy and political agency This book explores the deeper philosophical foundations of Fanon s project in order to understand the depths of Fanon s contribution to the theory of the subject and to social theory It also demonstrates how Fanon s model makes it possible to understand the political dimensions of Freudian psychoanalysis and the psychological dimensions of Hegel s social theory This is the first book to bring these two central dimensions of Fanon s thought into dialogue It uses Fanon s position to provide a deeper interpretation of key texts in Freud and Hegel and by uniting these three thinkers contributes to the creolization of all three thinkers *Narratives of Community in the Black British Short Story* Bettina Jansen,2018-08-16 *Narratives of Community in the Black British Short Story* offers the first systematic study of black British short story writing tracing its development from the 1950s to the present with a particular focus on contemporary short stories by Hanif Kureishi Jackie Kay Suhayl Saadi Zadie Smith and Hari Kunzru By combining a postcolonial framework of analysis with Jean Luc Nancy s deconstructive philosophy of community the book charts key tendencies in black British short fiction and explores how black British writers use the short story form to combat deeply entrenched notions of community and experiment with non essentialist alternatives across differences of ethnicity culture religion and nationality **Collaborative Social Design with Mexican Indigenous**

Communities Carmen Malvar,2023-03-16 This book builds on the work of anthropologists designers and ethnographers to develop an original methodology and framework for indigenous engagement and designer non designer collaboration in the field of social design Following a collaborative case study conducted over a five year period between the author project team and indigenous artisans in Mexico the book outlines the practical challenges of design research including funding logistics relationships between designers and communities failures successes and pivots Social design literature has often focused on introducing important questions to the design research process but fails to deeply interrogate and demonstrate how these theories inform research projects in action which can then be open to misinterpretation bias and unintended harmful consequences Centering the indigenous communities this book provides a detailed and clear example of not just why but how design and designers can work authentically and responsibly through different approaches and systems The book examines the specific cultural epistemological and socio political history of Mexico as it relates to colonization and indigenous peoples exploring the systemic influences of globalization and grounding the research in its unique context It includes field notes conversations with the indigenous artisan communities workshops and prototypes to offer unique insight into a detailed

collaborative social design initiative This book intersects with the growing awareness of the necessity of decolonial approaches to design across the world and will be an important and useful study for academics students and researchers in social design sustainable development cultural studies and anthropology *Intercultural Theology* Judith Gruber, 2017-12-04

Recent years have seen a paradigm shift in Christian self understanding In place of the eurocentric model of Christendom a new understanding is emerging of Christianity as a world movement with considerable cultural variety Concomitant with this changing self perception a new theological discipline begins to take shape which analyzes the inter and transcultural character and performance of global Christianity Intercultural Theology Judith Gruber discusses this nascent theological approach in two parts She first gives a critical analysis of its historical development in the first part of the book two theological sub disciplines of particular relevance are analysed 1 missiology and its reflection on the encounter of Western Christianity with other cultures in the context of colonialism 2 contextual theologies which focus on the particularity and dignity of the diverse cultural contexts of theological practice but fail to sufficiently integrate the universal dimension of Christianity into their theological reflections Secondly this study offers a constructive theological approach to intercultural theology It does that by bringing systematic theology into conversation with cultural studies This interdisciplinary approach adds significant complexity to existing reflections on Intercultural Theology Re reading the theological history of Christianity within the critical framework of cultural theories exposes a host of disparate and conflictive Christianities underneath its dominant master narrative and moreover it no longer allows a recourse to essentialist concepts of Christian identity with which previous approaches to Intercultural Theology have mitigated this unsettling cultural plurality of Christianity After the Cultural Turn which has made a metaphysical epistemology untenable new ways for thinking the unity and universality of Christianity have to be paved The book draws on Paul Ricoeur s and Michel Foucault s concept of the event and on Michel deCerteau s proposal of a Weak Christianity in order to develop such a post metaphysical framework which allows to conceive of the unity and universality of Christianity without concealing its cultural plurality and contingency **Art, Trade, and Imperialism in Early Modern French India** Liza Oliver, 2025-10-01 French mercantile endeavors in late seventeenth and eighteenth century India were marked by novel intersections of aesthetics science and often violent commercialism Connecting all of these worlds were the thriving textile industries of India s Coromandel Coast This book focuses on the integration of the Coromandel textile industries with French colonies in India from the founding of the French East India Company in 1664 to its debilitating defeat by the British during the Seven Years War Narratives of British trade and colonialism have long dominated eighteenth century histories of India overshadowing the French East India Company s far reaching sphere of influence and its significant integration into the political and cultural worlds of South India As this study shows the visual and material cultures of eighteenth century France and India were deeply connected and together shaped the century s broader debates about mercantilism liberalism and the global trade of goods ideas and humans

Griffith Rollefson, 2017-10-23 Hip hop has long been a vehicle for protest in the United States used by its primarily African American creators to address issues of prejudice repression and exclusion But the music is now a worldwide phenomenon and outside the United States it has been taken up by those facing similar struggles *Flip the Script* offers a close look at the role of hip hop in Europe where it has become a politically powerful and commercially successful form of expression for the children and grandchildren of immigrants from former colonies Through analysis of recorded music and other media as well as interviews and fieldwork with hip hop communities J Griffith Rollefson shows how this music created by black Americans is deployed by Senegalese Parisians Turkish Berliners and South Asian Londoners to both differentiate themselves from and relate themselves to the dominant culture By listening closely to the ways these postcolonial citizens in Europe express their solidarity with African Americans through music Rollefson shows
