It is considered a must read for data scientists, demographers, community leaders, or anyone interested in the trends that make up the lifeblood of the Jewish experience in America. We are proud of our contributions to this essential resource.

Jonathan A. Greenblatt, CEO and National Director of ADL, the Anti-Defamation League: "The American Jewish Year Book is a unique resource of tremendous value to anyone interested in global Jewish life. It is critical for people today, and it will be for those who come after us. Its lists capture not only critical information about key aspects of Jewish communal life but provide the opportunity for reflection, comparison, and analysis with other religious and ethnic communities."

Riv Ellen Prell, Professor Emerita, American Studies and the Center for Jewish Studies, University of Minnesota: [Public Sector Reform and Performance Management in Emerging Economies](#)

Zahirul Hoque, 2021-05-23: "In the recent decade, governments worldwide are increasingly focusing on being community-centric and outcomes-based. Consequently, they are starting to move towards outcomes-based approaches to public financial management systems. An outcomes-based approach allows government service agencies and specific program areas to organize and communicate priorities to achieve what matters and make a difference rather than just going through the motions. Empirical evidence on how government agencies in emerging economies go about this contemporary approach and issues affecting these practices is limited. This edited collection of chapters is aimed at covering public sector reform and performance management in emerging economies, with special reference to outcomes-based approaches in practice in government services. Practices from developed economies contained in the first book on the topic have been published by Routledge in February 2021. The insights offered on the topic are written by renowned scholars who have identified important issues pertinent to those interested in public sector governance, accounting, accountability, and performance management effectiveness in emerging economies. The book will be highly accessible to researchers, academics, and students in the fields of accounting, public administration, development studies, and other non-accounting audiences alike."

To help develop a deeper understanding of course concepts and move beyond basic understanding, students work through a high-quality assessment at varying levels, helping them learn more efficiently and create connections between topics and real-world application. This course also presents an emphasis on decision-making through Integrated Cases and Research and Analysis questions that allow students to analyze business transactions, apply both IFRS and ASPE, and explore how different accounting standards impact real companies. Throughout the course, students also work through a variety of hands-on activities, including Data Analytics Problems. Analytics in Action features Excel

templates and a new emphasis on sustainability all within the chapter context These applications help students develop an accounting decision making mindset and improve the professional judgement and communication skills needed to be successful in the evolving accounting world *The Southwestern Reporter* ,1902
