The Light Inside The Dark:

A Light in Dark Places Daniel Sykes, 2016-05-27 I worked as a welder fabricator for twenty five years and along the way and as long as I can remember I enjoyed a crowded room for enough time as was shared in my own space with or without company in the time I would love to relax Relaxing others who were a little pushy with questions most wouldnt answer also came to me a fair bit and I would enjoy actually saying something in another way other than that which they most likely expected and were looking for to transpose thoughts which just pop in the mind without even touching the sides and without provocative thoughts entering their heads and this would actually relax them and ease all words to the flow of other surrounding conversations that they now would if they wished more easily be able to join I had a lot of thought regarding my ability to defuse trouble which was always liked even by those who stirred the strings just to get an answer which if I wanted may give or use one of the other ways of reacting which I could choose in ensuring quality time which is short for not only myself but the others with and around me Sometimes when people brought things up that made others hush to hear the reply I would take the opportunity to say something anyway even though I didnt have to with a little thought and Witt and make the others laugh at the good old Aussie come backs being used even the ones that had to have more than a one line and if you could do it in two every one smiles and so poetry there was in the motion of freely playing the game of sharing the fun of showing the humour in good conversation

The Practical Astronomer: Comprising Illustrations of Light and Colours Practical Descriptions of All Kinds of Telescopes etc, etc. Thomas Dick, 2020-09-28 Light is that invisible ethereal matter which renders objects perceptible by the visual organs It appears to be distributed throughout the immensity of the universe and is essentially requisite to the enjoyment of every rank of perceptive existence It is by the agency of this mysterious substance that we become acquainted with the beauties and sublimities of the universe and the wonderful operations of the Almighty Creator Without its universal influence an impenetrable veil would be thrown over the distant scenes of creation the sun the moon the planets and the starry orbs would be shrouded in the deepest darkness and the variegated surface of the globe on which we dwell would be almost unnoticed and unknown Creation would disappear a mysterious gloom would surround the mind of every intelligence all around would appear a dismal waste and an undistinguished chaos To whatever quarter we might turn no form nor comeliness would be seen and scarcely a trace of the perfections and agency of an All Wise and Almighty Being could be perceived throughout the universal gloom In short without the influence of light no world could be inhabited no animated being could subsist in the manner it now does no knowledge could be acquired of the works of God and happiness even in the lowest degree could scarcely be enjoyed by any organized intelligence We have never yet known what it is to live in a world deprived of this delightful visitant for in the darkest night we enjoy a share of its beneficial agency and even in the deepest dungeon its influence is not altogether unfelt

1 The blind indeed do not directly enjoy the advantages of light but its influence is reflected upon them and their knowledge
