The Lunacy of Modern Finance Theory and Regulation Les Coleman, 2014-08-01 This provocative book provides insight into a finance industry that is run for the benefit of banks and service providers who rely on Beatles era theories and regulation which are totally unsuited to the modern world The author has a near unique perspective based on over 30 years of working literally around the globe for corporates fund managers and as finance academic In his last role his research has focused on investment decisions and during 2012 he interviewed 34 fund managers in Istanbul London New York and Melbourne He blends rich understanding of finance theory and practice to unravel the investment industry s structure and show how banks and other finance institutions privilege themselves at investors expense The book highlights that finance industry self regulation is weak Risks from inexpertise theft bad data and other sources are high Regulation of the industry appears to be ineffectual with the setting of such a high bar that it is virtually impossible to successfully prosecute even the most blatant and egregious offenders The book closes with the simple suggestion that corporations regulations be altered to introduce the strict liability offence of being a director or officer of a large bank that becomes bankrupt This follows the strategy of legislation that has been effective in cleaning up the environment making workplaces safer and reducing crime by punishing those responsible for an offence

Applied Investment Theory Les Coleman, 2017-02-14 Institutions now dominate trading in equities around the world Mutual funds are the most prominent and doubly important as custodians of retirement savings Despite this there is no comprehensive description of fund manager behaviour much less a matching theory This is troubling because one of the most economically significant puzzles in finance is why experienced well resourced fund managers cannot outperform the market

Investment Theory How Equity Markets Behave and Why brings together academic research empirical evidence and real market experience to provide new insights into equity markets and their behaviours The book draws upon the author s rich industry experience and academic research plus over 40 interviews with fund managers on three continents and across different markets The result is an innovative model that explains the puzzle of poor performance by mutual funds in terms of structural features of markets the managed investment industry and the conduct of fund managers This book provides a fully integrated depiction of what markets and investors do and why insights that will resonate with the needs of investors wealth managers and industry regulators It is fully documented but free of jargon and arcane math and provides a grounded theory that is relevant to anyone who wants to pierce the opacity of mutual fund operations Applied Investment Theory sets out a new paradigm in investment that is at the forefront of what should be an industrial scale development of new finance theory following two decades of almost back to back financial crises

Finance, Accumulation and Monetary Power Daniel Woodley, 2019-10-29 This accessible yet rigorous book examines the development of financial socialism in advanced capitalist economies in the decade since the global financial crisis of 2007 2009 This new term refers to an attempt to resolve the accumulation crisis of capital through coordinated central bank activism where state circuits of monetary capital assume a critical role in the reproduction of capitalist social relations The book explains the dynamics of the crisis as it has developed and assesses the response of monetary elites to systemic financial risk in the global economy Their failure to re engineer growth following the technology boom of the late 1990s and the global financial crisis are driving fundamental changes in the form and function of capitalist money which have yet to be theorized adequately Finance Accumulation and Monetary Power presents a revealing and radical critique of the failure of the International Political Economy to apprehend changes taking place within capitalism employing a critical theoretical analysis of contradictions in the capitalist reproduction scheme The book will be of key interest to scholars students and readers of international political economy critical political economy heterodox economics globalization international relations international political sociology business studies and finance

New Principles of Equity Investment Les Coleman, 2019-03-14 The book aligns the best of established theory empirical evidence and industry practice to operationalise equity investment and match it to practices in the real world It does not merely repackage the contemporary investment paradigm but develops a new perspective that follows a rigorous research philosophy and is based on field evidence

Research in Crisis Les Coleman, 2020-08-31 This book explores the weak explanatory and predictive power of theories across disciplines explains reasons for limited expertise after centuries of scientific effort and sets forth strategies to accelerate knowledge and manage a future we can only dimly comprehend Gaps in knowledge arose because common natural and artificial phenomena are fundamentally hard to understand and in expertise persists because research is unproductive This book argues that weak research comes with huge opportunity cost because it stymies optimum decision making by government corporations and individuals Research needs restructuring which must

come from governments top down requirement that funding bodies foster applied research with real world impact and that universities influence scientific publishers to improve their publications integrity This book seeks to catalyse extinction events for theories in most disciplines which would clear a path for solving multiple crises in research The author cautions that this process would be disruptive unpopular and painful
