two different types of stock investing systems One other thing that Graham uses in his book in order to explain what he wants to say is something that the author calls as Mr Market In his book Mr Market is depicted as an obligatory man who will come to the shareholder s door at each day while trying to buy or sell his shares at different prices The investors are given with the choice of either agreeing with his price and thus trade with him or ignore him Mr Market will have no problem with this because he will return another day with different prices Considering the book itself there were altogether four revisions of the book with the last revision being published back in 1973 However in the 2003 book version there were some new ideas and topics to be discussed such as The Investor and Inflation The Defensive Investors and Common Stocks and many more The Intelligent Investor is an interesting literature for many stockholders present and future investors and all other readers who simply want to know how certain things concerning investments and stocks function Here is a Preview of What You Will Get A Full Book Summary An Analysis Fun quizzes Quiz Answers Etc Get a copy of this summary and learn about the book
