The Making Of Us:

The Making of US Foreign Policy John Dumbrell, David M. Barrett, 1997 Fully revised and updated this new edition analyses the relationship between the process and substance of US foreign policy since the mid 1960s Narrative and the Making of US National Security Ronald R. Krebs, 2015-08-25 Dominant narratives from the Cold War consensus to the War on Terror have often served as the foundation for debates over national security Weaving current challenges past failures and triumphs and potential futures into a coherent tale with well defined characters and plot lines these narratives impart meaning to global events define the boundaries of legitimate politics and thereby shape national security policy However we know little about why or how such narratives rise and fall Drawing on insights from diverse fields Narrative and the Making of US National Security offers novel arguments about where these dominant narratives come from how they become dominant and when they collapse It evaluates these arguments carefully against evidence drawn from US debates over national security from the 1930s to the 2000s and shows how these narrative dynamics have shaped the policies pursued by the United States Colombian Agency and the making of US Foreign Policy Alvaro Mendez, 2017-06-26 This book studies a significant event in US relations with Latin America shedding light on the role of dependent states and their foreign policy agency in the process by which local concerns become intertwined with the dominant state s foreign policy Plan Colombia was a large scale foreign aid programme through which the US intervened in the internal affairs of Colombia by invitation It proved to be one of the major successes of US foreign policy and has been credited with stemming a potentially catastrophic security failure of the Colombian state This book discusses the strategies and practices deployed by the Colombian government to influence US foreign policy decision making at the bureaucratic legislative and executive levels and is a distinctive contribution to our understanding of the dynamics of small power agency Giving a clearer insight into the decision making processes in both the US and Colombia this book founds its argument on solid empirical analysis assembled from interviews of the major players in the events including Andres Pastrana President of Colombia Thomas Pickering US State Department Arturo Valenzuela Senior Director for Inter American Affairs at the NSA General Barry McCaffrey the US Drug Czar and Dennis Hastert Speaker of the US House of Representatives Approaching the events in question from a bottom up theoretical perspective that puts the emphasis on the facts of the case this book will be of great interest to academics students and policy makers in the field of foreign policy analysis US foreign policy studies and Latin American studies

Perception, and the Making of U.S.-China Relations Hongshan Li, 1998-06-25 Image Perception and the Making of U S China Relations examines major events in the history of the relationship between the U S and China to show the development and effects of national images and perceptions These essays expose the effects of ideology as represented through foreign policy and the actions of leaders as well as the role of the media and governments in shaping public opinion and attitudes They show the evolution of the influential forces from the nineteenth century through the twentieth century In each country a small group of people has always controlled these forces by manipulating the power of the media and governments The nature of this situation changed national perceptions as power often moved from one small group to another As a result of manipulating the images and perceptions of each country these biased and untrue views have inevitably led to conflict between the two countries

Lobbyists and the Making of US Tariff Policy, 1816–1861 Daniel Peart, 2018-10-01 The first book length study of lobbying prior to the Civil War Since the 2008 global economic crisis historians have embraced the challenge of making visible the invisible hand of the market This renewed interest in the politics of political economy makes it all the more timely to remind ourselves that debates over free trade and protection were just as controversial in the early United States as they have once again become and that lobbying then as now played an important part in Lincoln s government of the people by the people for the people In *Lobbyists and the Making of US Tariff Policy 1816-1861* Daniel Peart reveals how active lobbyists were in Washington throughout the antebellum era He describes how they involved themselves at every stage of the making of tariff policy from setting the congressional agenda through the writing of legislation in committee to the final vote Considering policymaking as a process Peart focuses on the importance of rules and timing the critical roles played by individual lawmakers and lobbyists and the high degree of uncertainty that characterized this formative period in American political development The debate about tariff policy Peart explains is an unbroken thread that runs throughout the pre Civil War era connecting disparate individuals and events and shaping the development of the United States in myriad ways Duties levied on imports provided the federal government with the major part of its revenue from the ratification of the Constitution to the close of the nineteenth century More controversially they also offered protection to domestic producers against foreign competition at the expense of increased costs for consumers and the risk of retaliation from international trade partners Ultimately this book uses the tariff issue to illustrate the critical role that lobbying played within the antebellum policymaking process

The President, the State and the Cold War James Bilsland, 2015-02-11 US foreign policy during the Cold War has been analysed from a number of perspectives generating large bodies of literature attempting to explain its origins its development and its conclusion However there are still many questions left only partially explained In large part this is because these accounts restrict themselves to a single level of analysis either the international system or the structure of the state and society The first level of analysis focusing on the role of individuals has largely been excluded This book argues that structural theories and any approach that limits itself to one level of analysis are inadequate to explain the development of US foreign policy Instead it is necessary to incorporate the first level of analysis in order to bring human agency back and provide a more detailed explanation of US foreign policy Bilsland proposes an analytical framework which incorporates presidential agency into a multi level analysis of US foreign policy during the Cold War constructing a multi level case study comparison of the foreign policies of Presidents Truman and Reagan He argues that the worldview of the president is central to agenda setting in US foreign policy making and that the management style of the president influences both decision making and the implementation of US foreign policy Evidence to support this is drawn from detailed empirical analysis of Truman's foreign policy of containment in Korea and Reagan's foreign policy of rollback in Nicaragua This work will be of interest to students and scholars of US Foreign Policy US History and International Relations
