Critical Thinking and Language Tim John Moore, 2011-10-13 This book clarifies the idea of critical thinking by investigating the critical practices of academics across a range of disciplines Drawing on key theorists Wittgenstein Geertz Williams Halliday and using a textographic approach the book explores how the concept of critical thinking is understood by academics and also how it is constructed discursively in the texts and practices they employ in their teaching Critical thinking is one of the most widely discussed concepts in debates on university learning For many the idea of teaching students to be critical thinkers characterizes more than anything else the overriding purpose of higher education But whilst there is general agreement about its importance as an educational ideal there is surprisingly little agreement about what the concept means exactly Also at issue is how and what students need to be taught in order to be properly critical in their field This searching monograph seeks answers to these important questions

James's Will-To-Believe Doctrine James C.S. Wernham, 1997-06-06 In 1896 William James published an essay entitled *The Will to Believe* in which he defended the legitimacy of religious faith against the attacks of such champions of scientific method as W K Clifford and Thomas Huxley James's work quickly became one of the most important writings in the philosophy of religious belief James Wernham analyses James's arguments discusses his relation to Pascal and Renouvier and considers the interpretations and misinterpretations of James's major critics Wernham shows convincingly that James was unaware of many destructive ambiguities in his own doctrines and arguments although clear and consistent in his view that our obligation to believe in theism is not a moral but a prudential obligation a foolish not to believe doctrine rather than a not immoral to believe one Wernham also shows that the doctrine is best read as affirming the wisdom of gambling that God exists a notion which James failed to distinguish from believing and which among other things he explicitly identified with faith James's pragmatism a

theory concerning the meaning of truth is shown to be quite distinct from the doctrine of The Will to Believe In concentrating on a careful analysis of this doctrine of the will to believe Wernham not only makes a major contribution to understanding James s philosophy but also clarifies issues in the philosophy of religion and in the analysis of belief and faith *The Routledge International Handbook of Automated Essay Evaluation* Mark D. study enriches a person's faith. With this in mind, this book asks prominent Bible teachers and scholars to tell their story reflecting on their own experiences at the intersection of faith and serious academic study of the Bible. While the essays of this book will provide some apology for academic study of the Bible as an important discipline, the essays engage with this question in ways that are uncontrived. They present real stories with all the complexities and struggles they may hold. To this end, the contributors do two things: a) reflect on their lives as someone who teaches and researches the Bible, providing something of a story outlining their journey of life and faith and their self-understanding as a biblical theologian; and b) provide focused reflections on how faith has made a difference, how it has changed, and what challenges have arisen, remained, and are unresolved, all with a view toward the future and engaging the book's main question.

Consciousness, Theatre, Literature and the Arts 2011 Daniel Meyer-Dinkgräfe, 2011-10-18 The essays collected in this volume were initially presented at the Fourth International Conference on Consciousness, Theatre, Literature and the Arts held at the University of Lincoln, May 28-30, 2011. The conference was organised on the basis of the success of its predecessors in 2005, 2007, and 2009, and on the basis of the success of the Rodopi book series *Consciousness, Literature and the Arts*, which has to date seen thirty volumes in print with another twelve in press or in the process of being written. The 2011 conference and the book series highlight the continuing growth of interest within the interdisciplinary field of consciousness studies and in the distinct disciplines of theatre studies, literary studies, film studies, fine arts, and music in the relationship between the object of these disciplines and human consciousness. Fifty-five delegates from twenty-eight countries across the world attended the May 2011 conference in Lincoln; their range of disciplines and approaches is reflected well in this book.
