Tenneriello, 2013-12-18 Scenic spectacles collapse the borders of graphic and visual arts multimedia technology spectatorship and architecture Drawing upon various systems of commercial institutional and public spectacle that intersect with scenic stages of the national landscape Tenneriello examines how spectacle is entrenched in the formation of national identity

Tokyo Vernacular Jordan Sand, 2013-07-13 Preserved buildings and historic districts museums and reconstructions have become an important part of the landscape of cities around the world Beginning in the 1970s Tokyo participated in this trend However repeated destruction and rapid redevelopment left the city with little building stock of recognized historical value Late twentieth century Tokyo thus presents an illuminating case of the emergence of a new sense of history in the city's physical

environment since it required both a shift in perceptions of value and a search for history in the margins and interstices of a rapidly modernizing cityscape. Scholarship to date has tended to view historicism in the postindustrial context as either a genuine response to loss or as a cynical commodification of the past. The historical process of Tokyo's historicization suggests other interpretations. Moving from the politics of the public square to the invention of neighborhood community to oddities found and appropriated in the streets to the consecration of everyday scenes and artifacts as heritage in museums, Tokyo Vernacular traces the rediscovery of the past sometimes in unlikely forms in a city with few traditional landmarks. Tokyo's rediscovered past was mobilized as part of a new politics of the everyday after the failure of mass politics in the 1960s. Rather than conceiving the city as national center and claiming public space as national citizens, the post-1960s generation came to value the local places and things that embodied the vernacular language of the city and to seek what could be claimed as common property outside the spaces of corporate capitalism and the state.

Handbook of Geotourism Ross Dowling, David Newsome, 2018-10-26. Ross Dowling and David Newsome present an original, substantial, and much-needed contribution to the field which will further our understanding of geotourism in theory and practice. This Handbook defines, characterizes, and explores the subject through a range of international perspectives and case studies, identifying geotourism as a rapidly emerging form of urban and regional sustainable development. With extensive case studies from North and South America, Europe, Asia, Australasia, and Africa, this global Handbook examines and explains the relationship between geology and tourism. Thematically arranged sections cover the relationship of geology with tourism, sustainability, and society; geotourism in urban areas; and interpretation and education strategies. The final two sections assess geotourism's impact through wide-ranging case studies of UNESCO global geoparks and geotourism in a range of countries. The eminent academics and practitioners demonstrate how geotourism is a vehicle for engaging the public and protecting geosites, as well as emphasizing the importance of sustainability. An essential resource for students and educators, this Handbook provides an international perspective for those interested in tourism, environmental geography, ecology, and geology. Written with practitioners in mind, this book reveals how tourism professionals and geologists can build a common vision by working together in sharing knowledge at the nexus of geology and tourism.
