InCIEC 2015 Marina Yusoff,Nor Hayati Abdul Hamid,Mohd Fadzil Arshad,Ahmad Kamil Arshad,Ahmad Ruslan Mohd Ridzuan,Haryati Awang,2016-06-18 The special focus of these proceedings is on the areas of infrastructure engineering and sustainability management They provide detailed information on innovative research developments in construction materials and structures in addition to a compilation of interdisciplinary findings combining nano materials and engineering The coverage of cutting edge infrastructure and sustainability issues in engineering includes earthquakes bioremediation synergistic management timber engineering flood management and intelligent transport systems *Computational Technologies in Project Based Learning* DR. ADITYA VIDYARTHI, DR. DEEPAK GUPTA,DR. JITENDRA SINGH KUSHAWAH,2022-10-04 Introducing our MERN based food ordering website a seamless platform that redefines the dining experience With a robust set of features including a user friendly cart system secure online payment options convenient Cash on Delivery and an intuitive admin panel our website ensures a delightful and efficient journey for both customers and administrators Embrace the future of food ordering with our technologically advanced and user centric platform Choosing to create a food ordering website using the MERN stack is like a hands on journey into tech and real world applications Picking the digital dining area means aiming for a simple and effective solution in today s online world It s about getting the hang of MongoDB Express js React and Node js in a practical way This project is all about combining tech exploration with making things easy for users diving into the nitty gritty of crafting a smooth and responsive app In a nutshell it s a down to earth exploration of web development using the MERN stack to cook up a practical and user friendly digital dining experience

Innovations in Electronic Materials: Advancing Technology for a Sustainable Future Subramanya K N,Hui-Ming Wee,Mario Orlando Oliveira,2025-01-11 This book delves into the cutting edge field of electronic materials focusing on their pivotal role in shaping a sustainable and technologically advanced future This comprehensive book brings together a selection of contributions that explore the transformative impact of electronic materials on various industries including health care aerospace energy and electronics The book places a spotlight on the forefront of technological innovation with a particular emphasis on nanoelectronics Readers will navigate through the technological landscape of electronic materials uncovering its significance in driving sustainable technologies that address the emerging challenges and also explore the emergent properties of electronic materials such as multifunctionality reliability and scalability Through in depth analysis and case studies this book showcases how these properties propel researchers in electronic material science toward ground breaking solutions with real world applications This book serves as a collaborative and descriptive platform fostering interdisciplinary discussions and knowledge exchange It acts as a bridge between various fields providing a space for researchers scientists and engineers to share cutting edge discoveries and advancements The book is more than a collection

of articles it is a forward looking exploration of the dynamic nature of material science and technology It highlights how researchers and engineers are pushing the boundaries leveraging the remarkable properties of materials to create solutions that enhance efficiency innovation and sustainability

Rigidly Framed Earth Retaining Structures Walid Aboumoussa, Magued Iskander, 2014-06-23 Structures placed on hillsides often present a number of challenges and a limited number of economical choices for site design An option sometimes employed is to use the building frame as a retaining element comprising a Rigidly Framed Earth Retaining Structure RFERS The relationship between temperature and earth pressure acting on RFERS is explored in this monograph through a 4 5 year monitoring program of a heavily instrumented in service structure The data indicated that the coefficient of earth pressure behind the monitored RFERS had a strong linear correlation with temperature The study also revealed that thermal cycles rather than lateral earth pressure were the cause of failure in many structural elements The book demonstrates that depending on the relative stiffness of the retained soil mass and that of the structural frame the developed lateral earth pressure during thermal expansion can reach magnitudes several times larger than those determined using classical earth pressure theories Additionally a nearly perpetual lateral displacement away from the retained soil mass may occur at the free end of the RFERS leading to unacceptable serviceability problems These results suggest that reinforced concrete structures designed for the flexural stresses imposed by the backfill soil will be inadequately reinforced to resist stresses produced during the expansion cycles Parametric studies of single and multi story RFERS with varying geometries and properties are also presented to investigate the effects of structural stiffness on the displacement of RFERS and the lateral earth pressure developed in the soil mass These studies can aid the reader in selecting appropriate values of lateral earth pressure for the design of RFERS Finally simplified closed form equations that can be used to predict the lateral drift of RFERS are presented

KEY WORDS Earth Pressure Soil Structure Interaction Mechanics Failure Distress Temperature Thermal Effects Concrete Coefficient of Thermal Expansion Segmental Bridges Jointless Bridges Integral Bridges Geotechnical Instrumentation Finite Element Modeling FEM Numerical Modeling
