

- 7 Connect the other end of both ground installation cables to the nearest ground installations, to complete the grounding of the UX300 and PIN pad units. See (C) in Figure 11.

Figure 11 Grounding the UX300 and PIN Pad Units

Service Switches

There are three anti-removal service switches: two on the front of the card reader (see Figure 1), and one on the back side of the unit (see Figure 3). These switches detect any unauthorized removal attempts and trigger a software event if the unit is removed in an unauthorized manner. This does not cause any hardware damage to the reader.

Using the Device

The card transaction procedure can vary depending on the application. Verify the proper procedure with your application provider before performing a card transaction.

The UX300 supports both magnetic stripe cards, as well as smart cards. The following section describes how to use the device's multi-card reader.

Using the Multi-Card Reader

The device's card reader supports both a triple-track card reader, as well as a variety of smart cards.

To conduct a card transaction

- 1 Position the card, with the magnetic stripe facing downward and to the right of the card, or with the chip on the top right of the card (see Figure 12).
- 2 Insert the card into the card reader slot in a smooth, continuous motion until it seats firmly.

If using a magnetic card, proceed to Step 3.

If using a smart card, proceed to Step 4.
- 3 Remove the magnetic stripe card.
