Parenty, Jack J. Domet, 2019-12-03 Cybersecurity threats are on the rise As a leader you need to be prepared to keep your organization safe Companies are investing an unprecedented amount of money to keep their data and assets safe yet cyberattacks are on the rise and the problem is worsening No amount of technology resources or policies will reverse this trend Only sound governance originating with the board can turn the tide Protection against cyberattacks can t be treated as a problem solely belonging to an IT or cybersecurity department It needs to cast a wide and impenetrable net that covers everything an organization does from its business operations models and strategies to its products and intellectual property And boards are in the best position to oversee the needed changes to strategy and hold their companies accountable Not surprisingly many boards aren t prepared to assume this responsibility In *A Leader's Guide to Cybersecurity* Thomas Parenty and Jack Domet who have spent over three decades in the field present a timely clear eyed and actionable framework that will empower senior executives and board members to become stewards of their companies cybersecurity activities This includes Understanding cyber risks and how best to control them Planning and preparing for a crisis and leading in its aftermath Making cybersecurity a companywide initiative and responsibility Drawing attention to the nontechnical dynamics that influence the effectiveness of cybersecurity measures Aligning the board executive leadership and cybersecurity teams on priorities Filled with tools best practices and strategies *A Leader's Guide to Cybersecurity* will help boards navigate this seemingly daunting but extremely necessary transition *Stopping the Spies* Jane Duncan, 2018-06-01 Is South Africa on its

way to becoming a surveillance state and will it need a whistleblower In 2013 former National Security Agency NSA contractor Edward Snowden leaked secret documents revealing that state agencies like the NSA had spied on the communications of millions of innocent citizens International outrage resulted but the Snowden documents revealed only the tip of the surveillance iceberg Apart from insisting on their rights to tap into communications more and more states are placing citizens under surveillance tracking their movements and transactions with public and private institutions The state is becoming like a one way mirror where it can see more of what its citizens do and say while citizens see less and less of what the state does owing to high levels of secrecy around surveillance In this book Jane Duncan assesses the relevance of Snowden s revelations for South Africa In doing so she questions the extent to which South Africa is becoming a surveillance society governed by a surveillance state Duncan challenges members of civil society to be concerned about and to act on the ever expanding surveillance capacities of the South African state Is surveillance used for the democratic purpose of making people safer or is it being used for the repressive purpose of social control especially of those considered to be politically threatening to ruling interests She explores the forms of collective action needed to ensure that unaccountable surveillance does not take place and examines what does and does not work when it comes to developing organised responses
