

VersaTenn V Upgrade Instructions

Tidal Engineering periodically releases software upgrades to the VersaTenn V controller's operating system and application. These upgrades are available by contacting Tidal Engineering (www.tidaleco.com) or TPS (www.thermafluidsolutions.com) and can be installed from a combination of up to four files that are compressed and delivered in a VTV_Installation.Zip file.

In the zip file you will find the following:

VTV_OS_4.2.Q_Disk_1.cab
VTV_OS_4.2.Q_Disk_2.cab
VTV_2.X.XX_WinImage.exe
VTVClean.exe

In addition, the zip file also includes:

Version_Change_History.txt
VTV App Note 14 - VTV Upgrade Instructions Rev E.pdf (this document)

Note: these file names are typical and will change depending on the current versions.

The VersaTenn V Application Version 2.X requires VersaTenn V Operating System 4.2.x. If your controller currently has a Version 1.X application, you will install the upgrade in the six steps described below.

1. Record the controller settings.
2. Prepare the floppy disks.
3. Upgrade the operating system.
4. Clean the controller's data files.
5. Upgrade the application.
6. Configure the controller.

If your controller already has a VersaTenn V Version 2.x application installed then you can skip step 3 when installing the upgrade.

Note: VersaTenn V 1.x.x applications will not work with VersaTenn V Operating 4.2.X.

Instructions

WARNING: You will need to re-enter the tuning and configuration parameters after this upgrade. You should note all of the PID settings and any non-default settings on your controller(s) before attempting an upgrade. You should also record your Cascade and Web Server registration keys if your chamber employs those features.

Required Items

1. Windows PC or workstation.
2. Tidal/TPS Supplied OS disks, Clean disk, and VTV Installation disk.
3. Four blank floppy disks.
4. PS/2 Keyboard.
5. VGA Monitor (optional).
