Vehicle Design Optimization System User Manual R. M. Southall, D. W. Twigg, 1977 **Guide for the selection of communication equipment for emergency first responders , Mobile Robots Navigation** Alejandra Barrera, 2010-03-01 Mobile robots navigation includes different interrelated activities i perception as obtaining and interpreting sensory information ii exploration as the strategy that guides the robot to select the next direction to go iii mapping involving the construction of a spatial representation by using the sensory information perceived iv localization as the strategy to estimate the robot position within the spatial map v path planning as the strategy to find a path towards a goal location being optimal or not and vi path execution where motor actions are determined and adapted to environmental changes The book addresses those activities by integrating results from the research work of several authors all over the world Research cases are documented in 32 chapters organized within 7 categories next described *Machine translation for everyone: Empowering users in the age of artificial intelligence* Dorothy Kenny , 2022-07-06 Language learning and translation have always been complementary pillars of multilingualism in the European Union Both have been affected by the increasing availability of machine translation MT language learners now make use of free online MT to help them both understand and produce texts in a second language but there are fears that uninformed use of the technology could undermine effective language learning At the same time MT is promoted as a technology that will change the face of professional translation but the technical opacity of contemporary approaches and the legal and ethical issues they raise can make the participation of human translators in contemporary MT workflows particularly complicated Against this background this book attempts to promote teaching and learning about MT among a broad range of readers including language learners language teachers trainee translators translation teachers and professional translators It presents a rationale for learning about MT and provides both a basic introduction to contemporary machine learning based MT and a more advanced discussion of neural MT It explores the ethical issues that increased use of MT raises and provides advice on its application in language learning It also shows how users can make the most of MT through pre editing post editing and customization of the technology The Cg Tutorial Randima Fernando, Mark J.
