Everything Is Natural James Kennedy, 2021-01-28 Since the early 1990s advances in toxicology have allowed scientists to detect traces of adulterant substances in everyday products even down to parts per billion concentrations We can now detect the presence of harmful ingredients at levels so low that they actually cause no harm Nonetheless we get scared We are now able to overreact to harmless negligible sources of contamination and flock to natural organic and chemical free alternative products at elevated prices instead This urge is driven in part by a set of interesting psychological quirks called the naturalness preference or biophilia While exposure to many aspects of nature improves our physical and mental wellbeing marketers are taking advantage of our naturalness preference by selling us organic and natural products with no functional advantage sometimes to the detriment of the environment and that have the unfortunate added effect of peddling a fear of conventional products that do not make such natural connotations This fear of chemicals exaggerated by marketers has led some of us to seek nature in the form of expensive consumer product which offer almost none of the benefits of spending time outdoors in real nature which is free of charge We thus chase nature in the wrong form We feel guilt anxiety and mental stress from being coaxed into paying a hefty premium price for natural products that are neither safer nor more effective than conventional ones and forget to appreciate real nature in the process This book explores the history of chemical fears and the recent events that amplified it It describes how consumers teachers doctors lawmakers and journalists can help make better connections with the public by telling stories that are more engaging about chemistry and materials science Written in a sympathetic way this book explains both sides of the argument for anyone with an interest in science
