Twentieth-Century Western Philosophy of Religion 1900-2000 Eugene Thomas Long, 2012-12-06 In the fall of 1994 Hendrik Jan van Leusen an acquisitions editor from Kluwer Academic Publishers visited me in my home to discuss a proposal for a handbook in the philosophy of religion He reported that he had been talking about this with philosophers of religion at several universities and that the response to the idea had been quite favorable I suggested that given the different approaches to the philosophy of religion it might be good for him to meet with philosophers representing different philosophical traditions at an upcoming meeting of the Eastern Division of the American Philosophical Association Jude Dougherty Joseph Kockelmans Robert Neville William Rowe and Merold Westphal kindly agreed to attend that meeting They made many substantial and helpful suggestions and a summary of the discussions was sent to van Leusen Some months later he wrote to inquire whether I might consider editing the series and writing the first volume which was to provide a historical map of twentieth century western philosophy of religion Although I could imagine myself editing the series I was initially reluctant to undertake the task of writing a volume that would take me across the lines of many different philosophical traditions By coincidence I had been asked some months earlier to contribute an essay on the philosophy of religion for a conference being held at the Catholic University of America on the general topic One Hundred Years of Philosophy

Religion and Scientific Method G. Schlesinger, 2012-12-06 I With the immense success of modern science it has generally become accepted that the only way to acquire knowledge is by the use of the method uniformly practiced by working scientists Consequently the credibility of the claims of religion which seem to be based on belief in revelation tradition authority and the like have been considerably shaken In the face of the serious threat provided by the ascendancy of modern scientific methodology religious thinkers have adopted various defensive attitudes Some have retreated into an extreme position where Theism is completely safe from any attack on it by the use of empirical methods of inquiry

maintaining that contrary to appearances religion makes no factual claims whatsoever To be religious they say is to subscribe to a certain value system it is to adopt a set of practices and a given attitude to the meaning and purpose of life without making any assertions about this or that empirical feature of the universe Others wishing to remain more faithful to what religion traditionally meant throughout the ages agree that Theism does make factual claims but that these are so radically different from the kind of claims made by science that it is only right that they should be established by a separate method on its own In matters of faith reliance on widely entrenched tradition and sacred authority is not objectionable according to some
