**Networks of Knowledge Production in Sudan** Sondra Hale, Gada Kadoda, 2016-09-14 This is the first book of its kind on Sudan and arguably one of the first in North Africa We are part of an emerging more cosmopolitan approach that calls for a reassessment of ideas about not only the concept of identities but also about migration and technology especially social media Our essayists engage in redefinitions the broadening of our key variables the linking and intersecting of concepts and the investigations of methods and ethics and opt for an approach that is at once culturally specific to Sudan one of the most fluid social landscapes in the world and transnational Our essays address the narrowness of studies of migration and note the

almost total neglect in the broader Sudan literature of the rise of technology mobile telephony and social media in particular Furthermore our essayists address the near neglect in the Sudan literature of certain categories of people such as youth or certain diverse spaces such as neighborhoods or gold mines We have also been attempting to move away from the nearly stereotypic descriptions of Sudan to deal with topics that align Sudan with transnational issues and themes knowledge production among them This multidisciplinary collection of essays is the first comprehensive work to grapple explicitly with the question of knowledge production in such a diverse social landscape We discuss the impact of current trends in information technology and contemporary forms of identity and mobility on knowledge production These issues are pertinent for different sectors such as academia government or business and as we demonstrate reveal a myriad of possibilities for studying diverse population groups like youth women diaspora or specific political contexts such as conflict or oppression

Ethics Across the Curriculum—Pedagogical Perspectives Elaine E. Englehardt, Michael S. Pritchard, 2018-05-08

This book features articles by more than twenty experienced teachers of ethics who are committed to the idea that ethics can and should be taught virtually anywhere in the education curriculum They explore a variety of ways in which this might best be done Traditionally confined largely to programs in philosophy and religion the teaching of ethics has in recent decades spread across the curriculum education The contributors to this book discuss the rationale for supporting such efforts the variety of challenges these efforts face and the sorts of benefits faculty and students who participate in ethics across the curriculum endeavors can expect An overriding theme of this book is that the teaching of ethics should not be restricted to one or two courses in philosophy or religion programs but rather be addressed wherever relevant anywhere in the curriculum For example accredited engineering programs are expected to ensure that their students are introduced to the ethical dimensions of engineering This can involve consideration of ethical issues within particular areas of engineering e g civil mechanical electrical chemical as distinctive segments of certain courses e g those that focus on design problems or as a full semester course in ethics in engineering Similar approaches can be taken in nursing medicine law social work psychology accountancy management and so on That is some emphasis on ethics can be expected to be found in broad range of academic disciplines However many ethical issues require careful attention from the perspectives of several disciplines at once and in ways that require their joining hands Recognizing that adequately addressing many ethical issues may require the inclusion of perspectives from a variety of disciplines makes apparent the need for effective communication and

reflection across disciplines not simply within them This in turn suggests that faculty and their students can benefit from special programs that are designed to include participants from a variety of disciplines Such programs will be a central feature of this book Although some differences might arise in how such issues might best be discussed across different parts of the curriculum these discussions might be joined in ways that help students faculty administrators and the wider public better appreciate their shared ethical ground
