Teaching New Literacies in Grades 4-6 Barbara Moss, Diane Lapp, 2009-11-24 Upper elementary students encounter a sometimes dizzying array of traditional and nontraditional texts both in and outside of the classroom This practical handbook helps teachers in grades 4-6 harness the instructional potential of fiction poetry and plays informational texts graphic novels digital storytelling Web based and multimodal texts hip hop advertisements math problems and many other types of texts Twenty four complete lessons promote critical literacy skills such as comprehending analyzing and synthesizing information and using writing to communicate new ideas and pose questions Snapshots of diverse classrooms are accompanied by clear explanations of the research base for instruction in each genre Ready to use reproducibles are included **Teaching History for the Common Good** Keith C. Barton, Linda S. Levstik, 2004-07-13 In *Teaching History for the Common Good* Barton and Levstik present a clear overview of competing ideas among educators historians politicians and the public about the nature and purpose of teaching history and they evaluate these debates in light of current research on students historical thinking In many cases disagreements about what should be taught to the nation's children and how it should be presented reflect fundamental differences that will not easily be resolved A central premise of this book though is that systematic theory and research can play an important role in such debates by providing evidence of how students think how their ideas interact with the information they encounter both in school and out and how these ideas differ across contexts Such evidence is needed as an alternative to the untested assumptions that plague so many discussions of history education The authors review research on students historical thinking and set it in the theoretical context of mediated action an approach that calls attention to the concrete actions that people undertake the human agents responsible for such actions the cultural tools that aid and constrain them their purposes and their social contexts They explain how this theory allows educators to address the breadth of practices settings purposes and tools that influence students developing understanding of the past as well as how it provides an alternative to the academic discipline of history as a way of making decisions about teaching and learning the subject in schools Beyond simply describing the factors that influence students thinking Barton and Levstik evaluate their implications for historical understanding and civic engagement They base these evaluations not on the disciplinary study of history but on the purpose of social education preparing students for participation in a pluralist democracy Their ultimate concern is how history can help citizens engage in collaboration toward the common good In *Teaching History for the Common Good* Barton and Levstik discuss the contribution of theory and research explain the theory of mediated action and how it guides their analysis and describe research on children's and adults knowledge of and interest in history lay out a vision of pluralist participatory democracy and its relationship to the humanistic study of history as a basis for evaluating the perspectives on the past that influence students learning explore four principal stances toward history identification analysis moral response and exhibition review research on the extent to which children and adolescents understand and accept each

of these and examine how the stances might contribute to or detract from participation in a pluralist democracy address six of the principal tools of history narrative structure stories of individual achievement and motivation national narratives inquiry empathy as perspective taking and empathy as caring and review research and conventional wisdom on teachers knowledge and practice and argue that for teachers to embrace investigative multi perspectival approaches to history they need more than knowledge of content and pedagogy they need a guiding purpose that can be fulfilled only by these approaches and preparation for participatory democracy provides such purpose Teaching History for the Common Good is essential reading for history and social studies professionals researchers teacher educators and students as well as for policymakers parents and members of the general public who are interested in history education or in students thinking and learning about the subject *Adapting to Diversity: Irish Schools and Newcomer Students* , The St. Louis Irish William Barnaby Faherty,2001 A French founded frontier village that transformed into a booming nineteenth century industrial mecca dominated by Germans the city of St Louis nonetheless resounds from the influence of Irish immigrants Both the history and the maps of the city are dotted with the enduring legacies of familiar celts John Mullanphy John O Fallon Cardinal John J Glennon but the true marks of the Irish in St Louis were made by the common immigrants those who fled their homeland to settle in the Kerry Patch on St Louis s near north side and their battle to maintain cultural ethnographic and religious roots Popular local historian William Barnaby Faherty S J offers readers a look into the history and effects of the Irish immigration to St Louis The author can now be placed within a rich Irish heritage in the world of publishing Joseph Charless editor of the first newspaper west of the Mississippi the Missouri Gazette William Marion Reedy editor of the Mirror and nineteenth century literary mogul Joseph McCullagh editor of the Globe Democrat in the late nineteenth century and controversial author Kate O Flaherty Chopin The Irish in St Louis is an enticing ethnographic history of one nationality clinging to its roots in a melting pot American city Both visitor and native St Louisian Irish or not will relish this history of one of St Louis s most enduring communities The Irish Teachers' Journal and Assistant ,1870 *Parliamentary Debates; Official Report[s]* Great Britain. The chapters in these two volumes bring together scholars from across the US and the globe who are interested in improving the quality of early childhood teacher education. The chapters present their experiences, perspectives, and lessons learned as they addressed some of the challenging issues concerning the education and preparation of future early childhood teachers.
