Remembering Who We Are Zev Chafets,2015-04-21 The perfect gift for graduates thirty commencement addresses about liberty patriotism tradition and other conservative themes that are rarely heard on campus The college graduation speech has become another casualty of our age of political correctness Historically universities are supposed to be strongholds of tolerance where any idea can be discussed and tested rigorously to see if it has merit Students should benefit from free expression and diversity of opinions about current events and eternal questions alike But today certain positions are considered too controversial for the fragile ears of liberal students and for administrators who usually surrender to their demands It s no longer unusual when a U S Senator like Ted Cruz a pioneering neurosurgeon like Ben Carson a Supreme Court Justice like Antonin Scalia or a human rights advocate like Ayaan Hirsi Ali faces protests disrespectful shouting or petitions to have his or her invitation revoked Fortunately Remembering Who We Are collects the commencement wisdom of a wide range of thinkers who are willing to challenge the liberal consensus on campus Editor Zev Chafets has brought together a diverse group of speakers from many walks of life from playwright David Mamet to Ambassador Ryan Crocker from Governor Bobby Jindal to humorist PJ O Rourke

Pens and Swords Marda Dunsky,2008-02-06 As world attention is renewed and refocused on the Israeli Palestinian conflict at the sixtieth anniversary of its seminal year of 1948 Marda Dunsky takes a close look at how more than two dozen major American print and broadcast outlets have reported the conflict in recent years Beginning with the failed Camp David summit of July 2000 through the waning of the second Palestinian uprising in the summer of 2004 she finds that the media omit two key contextual elements the significant impact that U S policy has had and continues to have on the trajectory of the conflict and the way international law and consensus have addressed the key issues of Israeli settlement and annexation policies and Palestinian refugees Dunsky explores how reports of the conflict routinely take on the contours of American policy and rarely challenge the premises of this Washington consensus She also examines the media s responses to allegations of biased coverage and gauges the effect that mainstream news reporting has on public opinion and U S foreign policy US Human Rights Conduct and International Legitimacy V. Gonzales,Richard Delgado,2015-12-03 Lucidly written widely informed and uncompromisingly honest a valuable expose Michael Parenti Documents the stunning success of a network of wealthy donors and corporations in creating and sustaining a set of think tanks legal action groups and media strategies Gary Orfield Harvard University What explains the electoral success of Republicans particularly of the ascendant neoconservatives who now dominate the Party Based on a thorough and up to date examination of the New Right over twenty five years The Politics of Fear proposes some provocative answers including globalization new technologies and a far reaching network of right wing think tanks and foundations As the authors show all have opened the doors to a new politics of fear successfully waged by the neoconservatives By manipulating insecurity the New Right has created an extraordinarily successful populist conservative movement Utilizing extensive documentation the authors argue convincingly that the fear of immigrants and racial minorities has served as the most effective tactic in the GOP arsenal while their approach also implicates gays feminists and terrorists The book explains why Americans have willingly supported a party that promises them security just as it delivers greater economic and political insecurity The authors argue that despite their striking political successes neoconservatives have delivered to voters a set of policies harmful to working Americans in the way of regressive tax measures military exploits tort reform deregulation and environmental destruction **The Limits of Legitimacy** Michael Zilis,2015-09-22 When the U S Supreme Court announces a decision reporters simplify and dramatize the complex legal issues by highlighting dissenting opinions and thus emphasizing conflict among the justices themselves

This often sensationalistic coverage fosters public controversy over specific rulings despite polls which show that Americans strongly believe in the Court's legitimacy as an institution. In *The Limits of Legitimacy* Michael A. Zilis illuminates this link between case law and public opinion. Drawing on a diverse array of sources and methods he employs case studies of eminent domain decisions, analysis of media reporting, an experiment to test how volunteers respond to media messages, and finally the natural experiment of the controversy over the Affordable Care Act, popularly known as Obamacare. Zilis finds that the media tends not to quote from majority opinions. However, the greater the division over a particular ruling among the justices themselves, the greater the likelihood that the media will criticize that ruling, characterize it as activist, and employ inflammatory rhetoric. Hethen demonstrates that the media's portrayal of a decision, as much as the substance of the decision itself, influences citizens' reactions to and acceptance of it. This meticulously constructed study and its persuasively argued conclusion advance the understanding of the media, judicial politics, political institutions, and political behavior.

American Television News: The Media Marketplace and the Public Interest Steve M. Barkin, 2016-09-16 This concise history of the news broadcasting industry will appeal to both students and general readers. Stretching from the radio days of the 1920s and 1930s and the early era of television after World War II through to the present, the book shows how commercial interests, regulatory matters, and financial considerations have long shaped the broadcasting business. The network dominance of the 1950s ushered in the new prominence of the anchorman, a distinctly American development, and gave birth to the golden age of TV broadcasting, which featured hard-hitting news and documentaries epitomized by the reports by CBS's Edward R. Murrow. Financial pressures and advertising concerns in the 1960s led the networks to veer away from their commitment to serve the public interest, and tabloid television, celebrity gossip, driven soft news, and news magazines became increasingly widespread. In the 1980s, cable news further transformed broadcasting, igniting intense competition for viewers in the media marketplace. Focusing on both national and local news, this stimulating volume examines the evolution of broadcast journalism. It also considers how new electronic technologies will affect news delivery in the 21st century and whether television news can still both serve the public interest and maintain an audience.

[The Science of Bureaucracy](#) David Demortain, 2020-01-21 How the US Environmental Protection Agency designed the governance of risk and forged its legitimacy over the course of four decades. The US Environmental Protection Agency was established in 1970 to protect the public health and environment, administering and enforcing a range of statutes and programs. Over four decades, the EPA has been a risk bureaucracy formalizing many of the methods of the scientific governance of risk, from quantitative risk assessment to risk ranking. Demortain traces the creation of these methods for the governance of risk, the controversies to which they responded, and the controversies that they aroused in turn. He discusses the professional networks in which they were conceived, how they were used, and how they served to legitimize the EPA. Demortain argues that the EPA is structurally embedded in controversy, resulting in constant reevaluation of its credibility and fueling the evolution of the knowledge and

technologies it uses to produce decisions and to create a legitimate image of how and why it acts on the environment He describes the emergence and institutionalization of the risk assessment risk management framework codified in the National Research Council's Red Book and its subsequent unraveling as the agency's mission evolved toward environmental justice ecological restoration and sustainability and as controversies over determining risk gained vigor in the 1990s Through its rise and fall at the EPA risk decision making enshrines the science of a bureaucracy that learns how to make credible decisions and to reform itself amid constant conflicts about the environment risk and its own legitimacy
