

What I Have Learned in This Course

I have learned a great deal in this course in relation to writing argumentative essays. There is much research involved, as well as objectivity to the position taken on a particular subject. These are, what I have learned, to be the two most important factors in the preparation for a paper. A writer must look at all possible arguments to support his or her position and make this very concise in the thesis statement in the first paragraph of the work. Similarly, one must look at any counterarguments that could arise from the thesis and explore these, as well.

All of this research must be done before the paper is written and woven in the supporting paragraphs in the piece. Of equal importance is taking a professional stance on the position/thesis and not an emotionally-driven stance. Using "I" statements is unacceptable, such as stating "I think that this is the best policy... ", for instance. Conclusions must come from extensive data review and demonstrate an extremely objective, yet clear stance on the subject from beginning to end.

All supporting paragraphs, after the introductory paragraph, that includes the thesis and main points that support it, should be filled with explanatory data to provide cause for the writer's position. After these arguments (supported by other research) are presented, then counterarguments should be noted. Having not only an literature review before beginning a paper, but, also, an outline with supporting arguments for the position and counter claims to the position with a response to them will make this portion of the argumentative paper easier and is extremely beneficial to the first draft of the work.

It is standard in a shorter essay to use four supporting paragraphs that all flow consistently from paragraph to paragraph and a conclusion that does not introduce new facts, but highlights the importance of the writer's previous information in this final paragraph. This final paragraph should not simply reiterate everything that is already written, but restate the main points and help further support the important stance taken on an issue. This "wrap-up" of the paper should leave no doubt in the reader's mind as to exactly what the writer intends the reader to absorb and the importance of the issue to that reader.

If further writing and research on the subject is planned, the final paragraph should indicate this. As many times, a short argumentative essay may evolve into a larger research project. After compiling the research, the outline, and then the first draft of the essay, a writer must then review the work and make any needed changes to the paper. Grammatical errors should be corrected, as well as any language that is unclear and may confuse the reader.

These essays must be very precise and to the point, so they may involve more than one revision to make a great final paper. I have, also, learned to ask for help involving feedback and constructive criticism.

What I Learned Essay:

What I Learned and What I Learnt Concetta A. Williams, Lydia Brown Magras, 2018-11-27 African Americans have viewed literacy as a key to upward mobility and freedom since before America's Reconstruction Era. However, African American academic achievement continues to be plagued by the ever-widening achievement gap, especially when their literacy skills are measured by standardized assessments that do not consider or value their culture, their experiences. It is common to think that this is an issue in K-12 settings. However, research and practical experiences suggest that African American students' achievement continues to be affected at the post-secondary level where they are likely to be taught by faculty who have limited experience with the nuances of Black English or African American Vernacular English (AAVE). This book steps into that gap by offering a resource for teaching speakers of AAVE at the post-secondary level. The St. Martin's Guide to Writing Rise B. Axelrod, Charles R. Cooper, 2010-01-26 This textbook provides instruction in college-level rhetoric and writing. It offers readings, a research manual, a handbook, and supports a range of approaches to teaching and learning, including collaboration, visual rhetoric, personal writing, writing about literature, writing in the community and the workplace, field research, portfolios, oral presentations, essay exams, and ESL. It contains step-by-step guides to writing specific kinds of essays: remembering events, writing profiles, explaining a concept, finding common ground, arguing a position, proposing a solution, justifying an evaluation, speculating about causes, and interpreting stories. Because so much college writing requires strong argumentation skills, four of the assignment chapters focus on argumentative writing, and a separate strategies chapter covers theses, reasons, and support, counterarguments, and logical fallacies. Three full chapters on research give students useful strategies not only for conducting field, library, and Internet research but also for evaluating sources, deciding whether to quote, paraphrase, or summarize, avoiding plagiarism, and documenting sources. The authors have included 39 readings by well-known authors and various fresh voices, including 12 students providing well-written examples of the different types of essays and papers that students might be asked to complete. **Axelrod & Cooper's Concise Guide to Writing** Rise B. Axelrod, Charles R. Cooper, 2011-10-19 Adapted from the best-selling St. Martin's Guide to Writing, Axelrod and Cooper's Concise Guide to Writing provides streamlined versions of the chapters covering six of the most commonly assigned genres in the first-year writing course: remembering events, writing profiles, explaining concepts, arguing a position, proposing a solution, and justifying an evaluation. The careful integration of well-chosen readings with guided writing instruction in these chapters is complemented by coverage of strategies for reading, writing, and research in brief but complete chapters at the end of the book.
