## **What Is Eez:**

**The Exclusive Economic Zone** Charles Quince, 2019-02-15 Traditionally the law of the sea was divided into the territorial sea and the high seas which accounted for the application of different rules under different circumstances Concerning the territorial sea the coastal state enjoys full sovereignty to the right of innocent passage while under the high seas rules all countries enjoy multifaceted uses of the sea qualified only by the limitations imposed by international law The development of the exclusive economic zone ended this traditional dualism and ushered in guidelines that are embodied within the text of the LOS Convention The Exclusive Economic Zone presents to academia and the general reading public a comprehensive study of the EEZ concept as it relates to the LOS Convention and state practice The Exclusive Economic Zone shows that even through coastal states have the right to develop a 200 miles EEZ and that this right is an integral part of contemporary international relations it is also true that the EEZ concept is shrouded in legal ambiguities Using qualitative and inductive methods the scholarship draws on treaties official proclamations government archives and scholarly works that are germane to the development of the EEZ Students scholars and members of the general public with an interest in international law will find that The Exclusive Economic Zone deepens their understanding of the evolution of the EEZ concept

*Law of the Sea* Ram Prakash Anand, 1978      *Agro-ecological Zoning* Food and Agriculture Organization of the United Nations. Soil Resources, Management, and Conservation Service, 1996-01-01      The Continental Shelf and the Exclusive Economic Zone / Le plateau continental et la zone économique exclusive Donat Pharand, Umberto Leanza, 2022-02-22 This volume focuses on both the general aspects of two of the most typical institutions introduced by the new Law of the Sea and the specific aspects related to the geographic and economic circumstances of Italy and Canada It is divided into two parts The first part deals with the delimitation of maritime boundaries especially with respect to the continental shelf and the exclusive economic zone The problem is approached from both a theoretical and a practical point of view in particular in analyzing not only the more well known controversies in delimitation solved by international agreements or by international courts but also still unsettled disputes in which Italy and Canada are involved The second part deals with the legal regime of the continental shelf and the exclusive zone and the activities in particular exploration and exploitation carried out in them The same approach as in Part One is used in juxtaposing Italian and Canadian views on relative regulation Indeed the volume brings together the diverse legal experience of the two countries Italy and Canada resulting from the different geographic political and economic conditions found in each It is enough to think that Italy is surrounded on three sides by a closed or semiclosed sea the Mediterranean while Canada borders on the Atlantic Pacific and Arctic Oceans The volume was financed by the Italian National Research Council CNR and edited by Donat Pharand Professor Emeritus of International Law at the University of Ottawa and Umberto Leanza Full Professor of International Law at the University of Rome Tor Vergata

**African States and Contemporary International Law** Tayo O. Akintoba, 1996 The Third Conference on the Law of the Sea marked a watershed in the emergence of African diplomatic and legal activities within the international system Analysis of those states participation therefore not only provides a template for the study of bloc activity at this level it also adds the comprehensive analysis of African participation at UNCLOS III and finally it should also reveal the means by which states can more effectively impact global political and legislative processes This study evaluates the extent to which the Exclusive Economic Zone EEZ concept represents an attempt by African states to allot to international law the task of correcting inequities between nations and the future implications of such linkage It critically explores and analyzes the conceptual framework that initiated action by African states in UNCLOS III and it examines their attempts to operationalize this framework by their substantive participation in the negotiations Finally the study explores the future implications of African activity in the international legal and political system In this evaluative process the author suggests the need for greater insight in conceptualizing the role of African states as a bloc within the international system Only in this manner can a better appreciation be had of the important role African states are playing as contributors in the formation of contemporary

international law      Specially Protected Marine Areas in the Exclusive Economic Zone (EEZ) Thomas Dux, 2011 This thesis examines the question of what States are legally empowered to do under international law when they seek to protect certain areas of their Exclusive Economic Zone EEZ In this context the regulation of shipping and other human activities under the Law of the Sea Convention and in particular the regime for special areas under Article 211 6 of the Convention are addressed Global and regional instruments containing mechanisms to protect specific areas are discussed and relevant State practice is considered with a view to possible implications on customary international law Finally guidance is given as to what States can practically do to protect specific areas of their EEZ for environmental reason Series Schriften zum See und Hafenrecht Vol 18

**Coastal State Jurisdiction over Living Resources in the Exclusive Economic Zone** Camille Goodman, 2021-11-15 Under the 1982 United Nations Convention on the Law of the Sea coastal States have sovereign rights to explore exploit conserve and manage the living resources of the 200 nautical mile exclusive economic zone EEZ However 40 years after the adoption of the Convention there is still a great deal of uncertainty about the nature and extent of these sovereign rights Coastal State Jurisdiction over Living Resources in the Exclusive Economic Zone examines the ways in which coastal States can exercise authority on the basis of their sovereign rights over living resources in the EEZ Dr Camille Goodman explores the key concepts of fishing and fishing related activities to establish what vessels and which activities can be regulated by coastal States canvasses the criteria and conditions that coastal States can apply as part of regulating foreign access to their resources and considers the regulation of unlicensed foreign fishing vessels in transit through the EEZ Goodman also examines how such regulations can be enforced within the EEZ and the circumstances under which enforcement can take place beyond the EEZ following hot pursuit A review and analysis of the practice of 145 States identifies the contemporary extent of coastal State jurisdiction over living resources in the EEZ and offers a unique fresh perspective on the underlying and enduring nature of that jurisdiction Underpinned by a rigorous examination of the Convention jurisprudence and literature as well as being supported by carefully documented State practice Coastal State Jurisdiction over Living Resources in the Exclusive Economic Zone proposes a more predictable framework within which to resolve jurisdictional challenges in the EEZ      *The 200 Mile Exclusive Economic Zone in the Law of the Sea* Barbara
