Global guidance framework for the responsible use of the life sciences ,2022-09-13 The framework aims to provide global perspectives on principles tools and mechanisms to support Member States and relevant stakeholders to mitigate and prevent biorisks and govern dual use research The framework adopts the One health approach and focuses on the role that responsible life sciences research can play in preventing and mitigating risks caused by accidents inadvertent or deliberate misuse with the intention to cause harm to humans nonhuman animals plants and agriculture and the environment The framework is primarily intended for those who have responsibilities in the governance of biorisks such as policy makers and regulators in charge of developing national policies to harness the potential benefits of the life sciences while constraining their risks The framework is also directed towards scientists and research institutions educators trainers project management staff funding bodies publishers editors the private sector and all relevant stakeholders that are part of the research life cycle The governance of biorisks is an issue that should engage all countries although countries will have different contexts needs and starting points Mitigating these risks will require individual and collective actions among different stakeholders and disciplines Mitigating biorisks and governing dual use research is a shared responsibility

Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. Suk,Kathleen M. Vogel,Amanda Jane Ozin,2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives [SET Life Science: Solved Exam Questions](#) Kailash Choudhary,D. Integrating Discovery-Based Research into the Undergraduate Curriculum National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Division on Earth and Life Studies, Committee for

Convocation on Integrating Discovery-Based Research into the Undergraduate Curriculum,2016-01-07 Students who participate in scientific research as undergraduates report gaining many benefits from the experience However undergraduate research done independently under a faculty member s guidance or as part of an internship regardless of its individual benefits is inherently limited in its overall impact Faculty members and sponsoring companies have limited time and funding to support undergraduate researchers and most institutions have available or have allocated only enough human and financial resources to involve a small fraction of their undergraduates in such experiences Many more students can be involved as undergraduate researchers if they do scientific research either collectively or individually as part of a regularly scheduled course Course based research experiences have been shown to provide students with many of the same benefits acquired from a mentored summer research experience assuming that sufficient class time is invested and several different potential advantages In order to further explore this issue the Division on Earth and Life Studies and the Division of Behavioral and Social Sciences and Education organized a convocation meant to examine the efficacy of engaging large numbers of undergraduate students who are enrolled in traditional academic year courses in the life and related sciences in original research civic engagement around scientific issues and or intensive study of research methods and scientific publications at both two and four year colleges and universities Participants explored the benefits and costs of offering students such experiences and the ways that such efforts may both influence and be influenced by issues such as institutional governance available resources and professional expectations of faculty Integrating Discovery Based Research into the Undergraduate Curriculum summarizes the presentations and discussions from this event *Comparative Approaches to Biotechnology Development and Use in Developed and Emerging Nations* Bas, Tomas Gabriel,Zhao, Jingyuan,2016-10-19 The development of biotechnological innovations is quickly becoming a globalized phenomenon as emerging nations are making major strides to compete with more developed economies Though efforts to bridge the gap between emerging and developed nations have been successful there are still many barriers that need to be overcome *Comparative Approaches to Biotechnology Development and Use in Developed and Emerging Nations* evaluates the importance of manufacturing biotechnological products around the world Highlighting a comparative analysis of public policies technological policies innovations and marketing capabilities of developed and emerging nations this publication is a pivotal reference source for government officers policy makers academics and practitioners Undergraduate Research at Community Colleges Nancy H. Hensel,2023-07-03 Co published with the Council on Undergraduate ResearchThis book highlights the exciting work of two year colleges to prepare students for their future careers through engagement in undergraduate research It emerged from work in five community college systems thanks to two National Science Foundation grants the Council for Undergraduate Research received to support community colleges efforts to establish undergraduate research programs Chapters one two and three provide background information about community colleges undergraduate research and the

systems the author worked with California City University of New York Maricopa Community College District Arizona Oklahoma and Tennessee Chapter four examines success strategies The next five chapters look at five approaches to undergraduate research basic applied course based community based interdisciplinary and partnership research Chapters ten eleven and twelve discuss ways to assess and evaluate undergraduate research experiences inclusive pedagogy and ways to advance undergraduate research Today there are 942 public community colleges in the United States providing affordable access to 6.8 million students who enrolled for credit in one of the public two year institutions in the United States Students are more prepared for the next step in their education or careers after participating in quality UR experiences

Cyber-Physical Laboratories in Engineering and Science Education Michael E. Auer, Abul K.M. Azad, Arthur Edwards, Ton de Jong, 2018-04-26 This volume investigates a number of issues needed to develop a modular effective versatile cost effective pedagogically embedded user friendly and sustainable online laboratory system that can deliver its true potential in the national and global arenas This allows individual researchers to develop their own modular systems with a level of creativity and innovation while at the same time ensuring continuing growth by separating the responsibility for creating online laboratories from the responsibility for overseeing the students who use them The volume first introduces the reader to several system architectures that have proven successful in many online laboratory settings The following chapters then describe real life experiences in the area of online laboratories from both technological and educational points of view The volume further collects experiences and evidence on the effective use of online labs in the context of a diversity of pedagogical issues It also illustrates successful online laboratories to highlight best practices as case studies and describes the technological design strategies implementation details and classroom activities as well as learning from these developments Finally the volume describes the creation and deployment of commercial products tools and services for online laboratory development It also provides an idea about the developments that are on the horizon to support this area
