

Diagnostic Systems And Types Of OBD

What Is Diagnosis?

- The on-board diagnostic system is the vehicle's self-diagnosis function that is provided by the ECU (Electronic Control Unit).
- Upon receiving the signals from the sensors that detect the conditions of the vehicle, the ECU transmits signals to the actuators optimally for the current conditions.
- The ECU receives signals from the sensors in the form of voltage.
- The ECU can determine the conditions of the system by detecting the changes in the voltage of the signals that are output by the sensors.
- Thus, the ECU constantly monitors the input signals
