Recipes for Wheatless Cakes and Bread, Meatless Dishes, Sugarless Candies, Delicious War Time Desserts [etc.] ...* Mary Elizabeth, 1918

Bioconversion of Wastes to Value-added Products Olena Stabnikova, Oleksandr Shevchenko, Viktor Stabnikov, Octavio Paredes-López, 2023-08-17 Bioconversion of agricultural and industrial wastes into useful products plays an important role both in the economy and in the prevention of environmental pollution. This book presents technological approaches to the biotransformation of different wastes into valuable products and demonstrates developments in the field of organic waste disposal. Organized in four parts, *Bioconversion of Wastes to Value-added Products* addresses the bioconversion of wastes to a new food products, b energy, c biotechnological products and d describes the construction of biosensors for food control. Features: Covers the use of different food waste to enrich meat, dairy, bakery and confectionery products. Presents new technologies for utilization of wastes from the meat, dairy and wine industries among others. Promotes bioconversion of agricultural wastes into energy such as hydrogen or biogas. Proposes the use of industrial wastes to produce exopolysaccharides using bacteria or macromycetes. Describes design, construction and testing of biosensors for food control. The book is an aid to scientists and engineers contributing to manufacturing of useful products from non-recyclable wastes as well as the creation of environmentally friendly technologies that protect the environment from potential contaminants.

Pets Need Wholesome Food Also, **American Cookery**, 1919 **Current Strategies to Improve the Nutritional and Physical Quality of Baked Goods** Mario Martínez Martínez, Manuel Gómez Pallarés, 2020-03-18 The lifestyle of humans is rapidly changing and correspondingly their needs and the current and future megatrends of the food market. It is worth mentioning: 1 the preference for natural, simple and flexible diets that drive the further expansion of plant-focused formulations; 2 the focus on food sustainability, food waste reduction; and 3 the interest in healthy eating as the basis for good health. The hectic routine and rapid urbanization in developed and developing regions respectively have shifted consumer preferences toward bread and baked foods, which interestingly are often high in sugars and are categorized as having a high glycemic index. Therefore, it is of major importance to address the technological challenges of manufacturing baked goods with high physical and sensory quality that result in positive metabolic responses. This Special Issue seeks to provide fundamental understanding in this area and novel strategies to improve the nutritional properties of baked goods, including a decrease in starch bioaccessibility, sugar reduction, increase in fiber and/or protein content, and the improvement of phytochemical bioactivity. This Special Issue will also cover studies on the physical and sensory improvements of baked goods that may provide a mechanistic understanding to minimize the loss of quality after the incorporation of nutritional improving ingredients such as edible byproducts, proteins or fibers. Last but not least, studies focused on the reduction of additives, clean

label or fat and on the use of sourdough to improve the sensory properties of baked goods will also be included **Silver**
