proceedings of the First International Workshop on Data Integration in the Life Sciences DILS 2004 held in Leipzig, Germany, in March 2004. The 13 revised full papers and 2 revised short papers presented were carefully reviewed and selected from many submissions. The papers are organized in topical sections on scientific and clinical workflows, ontologies and taxonomies, indexing and clustering, integration tools and systems, and integration techniques. Life Scientific Philosophy, Phenomenology of Life and the Sciences of Life Anna-Teresa Tymieniecka, 2013-03-09 This collection brings to the public the fruits of the groundlaying work on the philosophy/phenomenology of life presented in some 30 volumes of the *Analecta Husserliana* and inaugurates a new phase in philosophy/phenomenology: a truly radical turn. As Tymieniecka in her

introduction puts it the time is ripe to abandon the prejudices against empiria and set aside in a second position the epistemological constitutive criterion of validity and truth without however abandoning it To the contrary recognising with our present culture the overwhelmingly superior validity of the pragmaticity test which science indubitably applies in its verification of technology philosophy phenomenology at last reaches the full significance of reality the fullness of the vital fact of life which comprises not only the works and enjoyment of the mind and the spirit but those of the bios and the cosmos too The full fledged dialogue with the hard core sciences opens up philosophy of life and the human creative condition draws together all the radiations of life into its field of inquiry Tymieniecka thus proposes a new mathesis universalis the dream of Leibniz and Husserl which can at least be fulfilled
