UNIT 6: GLOBAL WARMING

1. How can young people help to reduce global warming?

Well, as a youngster, I suppose there are several practiceable ways to improve the current environmental condition.

Especially students, we tend to splurge money on non-essential products and throw them away after a short time. That creates a huge carbon footprint while it is suggested that we contemplate what we're inclined to buy, choose fine quality products and use them carefully for a long time.

2. What are the benefits of using eco-friendly products?

Obviously, eco-friendly products create positive impact on both individuals and the environment. It goes without saying that biodegradable or recyclable materials help cut down the amount of waste, which would take thousand years to break down. In manufacturing process, environmentally-friendly products also use less resources like water or electricity, thus reduce the carbon footprint.

Taking personal advantages into consideration, people's health can be improved by using eco-friendly food or utensils because we can avoid prolonged exposure to hazardous chemicals, which would bring about diseases in the long run. Furthermore, via those products, we can make
