Text Variability Measures in Corpus Design for Setswana Lexicography Thapelo J. Otlogetswe, 2011-01-18 This book is about the design of a Setswana corpus for lexicography While various corpora have been compiled and a variety of corpora based research has been attempted in African languages no effort has been made towards corpus design Additionally although extensive analysis of the Setswana language has been done by missionaries grammarians and linguists since the 1800s none of this research is in corpus design Most research has been largely on the grammatical study of the language The recent corpora research in African languages in general has been on the use of corpora for the compilation of dictionaries and little of it is in corpus design Pioneers of this kind of corpora research in African languages are Prinsloo and De Schryver 1999 De Schryver and Prinsloo 2000 and 2001 and Gouws and Prinsloo 2005 Because of a lack of research in corpora design particularly in African languages this book attempts to fill that gap especially for Setswana It is hoped that the finding of this study will inspire similar designs in other languages comparable to Setswana We explore corpus design by focusing on measuring a variety of text types for lexical richness at comparable token points The study explores the question of whether a corpus compiled for lexicography must comprise a variety of texts drawn from different text types or whether the quality of retrieved information for lexicographic purposes from a corpus comprising diverse text varieties could be equally extracted from a corpus with a single text type This study therefore determines whether linguistic variability is crucial in corpus design for lexicography

Effectiveness of teachers' guides in the Global South Benjamin Piper, Yasmin Sitabkhan, Jessica Mejia, Kellie Betts, 2018-05-10 This report presents the results of RTI International Education's study on

teachers guides across 13 countries and 19 projects Using quantitative and qualitative methods we examine how teachers guides across the projects differ and find substantial variation in the design and structure of the documents We develop a scripting index so that the scripting levels of the guides can be compared across projects The impact results of the programs that use teachers guides show significant impacts on learning outcomes associated with approximately an additional half year of learning showing that structured teachers guides contribute to improved learning outcomes During observations we find that teachers make a variety of changes in their classroom instruction from how the guides are written showing that the utilization of structured teachers guides do not create robotic teachers unable to use their own professional skills to teach children Unfortunately many changes that teachers make reduce the amount of group work and interactivity that was described in the guides suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide The report includes a set of research based guidelines that material developers can use to develop teachers guides that will support effective instructional practices and help improve learning outcomes The key takeaway from the report is that structured teachers guides improve learning outcomes but that overly scripted teachers guides are somewhat less effective than simplified teachers guides that give specific guidance to the teacher but are not written word for word for each lesson in the guide

The Cambridge History of South African Literature David Attwell, Derek Attridge, 2012-01-12 South Africa's unique history has produced literatures in many languages in both oral and written forms reflecting the diversity in the cultural histories and experiences of its people The Cambridge History offers a comprehensive multi authored history of South African literature in all eleven official languages and more minor ones of the country produced by a team of over forty international experts including contributors from all of the major regions and language groups of South Africa It will provide a complete portrait of South Africa's literary production organised as a chronological history from the oral traditions existing before colonial settlement to the post apartheid revision of the past In a field marked by controversy this volume is more fully representative than any existing account of South Africa's literary history It will make a unique contribution to Commonwealth international and postcolonial studies and serve as a definitive reference work for decades to come
