Sixties Counterculture and the Personal Computer (What the Dormouse Said) ,2006 The internet is arguably the largest accumulation of information in one place yet its own beginnings remain largely undocumented In researching his recent book John Markoff collected oral histories from many of the Stanford area researchers whose technological inventions defined the both modern internet and personal computer In his talk Markoff will explore the role that the counterculture and anti war movements of the 1960s and 1970s played in the work of these researchers as they created what would later be called the world s largest legal accumulation of wealth

Piracy Adrian Johns,2010-01-15 Since the rise of Napster and other file sharing services in its wake most of us have assumed that intellectual piracy is a product of the digital age and that it threatens creative expression

as never before The Motion Picture Association of America for instance claimed that in 2005 the film industry lost 2.3 billion in revenue to piracy online But here Adrian Johns shows that piracy has a much longer and more vital history than we have realized one that has been largely forgotten and is little understood Piracy explores the intellectual property wars from the advent of print culture in the fifteenth century to the reign of the Internet in the twenty first Brimming with broader implications for today's debates over open access fair use free culture and the like Johns's book ultimately argues that piracy has always stood at the center of our attempts to reconcile creativity and commerce and that piracy has been an engine of social technological and intellectual innovations as often as it has been their adversary From Cervantes to Sonny Bono from Maria Callas to Microsoft from Grub Street to Google no chapter in the story of piracy evades Johns's graceful analysis in what will be the definitive history of the subject for years to come

The Innovators Walter Isaacson, 2014-10-07 Following his blockbuster biography of Steve Jobs Walter Isaacson's New York Times bestselling and critically acclaimed The Innovators is a riveting propulsive and at times deeply moving The Atlantic story of the people who created the computer and the internet What were the talents that allowed certain inventors and entrepreneurs to turn their visionary ideas into disruptive realities What led to their creative leaps Why did some succeed and others fail The Innovators is a masterly saga of collaborative genius destined to be the standard history of the digital revolution and an indispensable guide to how innovation really happens Isaacson begins the adventure with Ada Lovelace Lord Byron's daughter who pioneered computer programming in the 1840s He explores the fascinating personalities that created our current digital revolution such as Vannevar Bush Alan Turing John von Neumann J. C. R. Licklider Doug Engelbart Robert Noyce Bill Gates Steve Wozniak Steve Jobs Tim Berners-Lee and Larry Page This is the story of how their minds worked and what made them so inventive It's also a narrative of how their ability to collaborate and master the art of teamwork made them even more creative For an era that seeks to foster innovation creativity and teamwork The Innovators is a sweeping and surprisingly tenderhearted history of the digital age The New York Times

Moonshot Moments Milan Kordestani, 2025-04-08 While humanity faces unprecedented ecological and social challenges advances in technology and our understanding of the mind are creating the conditions for a global renaissance Weaving together personal transformation through transhumanism with a call for global collaboration author Milan Kordestani presents an inspiring roadmap to a brighter future Humanity stands at a crossroads Technological development outpaces our confidence with each innovation bringing both wonder and unease We grapple with the fear of the unknown and the anxieties of a rapidly changing world We wonder if new technologies will decimate our job market increase inequality or endanger our species But what if the key to unlocking our full potential lies not in clinging to the familiar but in embracing humanity's potential for radical thinking Moonshot Moments is a marriage of science philosophy history and futurism Bestselling author Milan Kordestani chronicles his journey to thrilling and unforeseen frontiers in our understanding of consciousness the self and humanity's cosmic destiny His exploration moves beyond the

growing anxiety over rapid AI development to offer a unifying transhumanist vision for the future of humankind He delves into the biohacking of human consciousness exploring how amid a world offering both suffering and joy we can cultivate presence and discover meaning in our lives Readers will discover how to organize their own mindsets and work toward a collaborative community that is fueled by innovation building a society that will spark solutions to tomorrow's challenges Moonshot Moments is not just a glimpse into a brighter future it's a blueprint for actively creating it *American Trip* Ido Hartogsohn, 2020-07-14 How historical social and cultural forces shaped the psychedelic experience in midcentury America from CIA LSD experiments the Harvard Psilocybin Project Are psychedelics invaluable therapeutic medicines or dangerously unpredictable drugs that precipitate psychosis Tools for spiritual communion or cognitive enhancers that spark innovation Activators for one's private muse or part of a political movement In the 1950s and 1960s researchers studied psychedelics in all these incarnations often arriving at contradictory results In *American Trip* Ido Hartogsohn examines how the psychedelic experience in midcentury America was shaped by historical social and cultural forces by set the mindset of the user and setting the environments in which the experience takes place He explores uses of psychedelics that range from CIA and military experimentation to psychedelic inspired styles in music fashion design architecture and film Along the way he introduces us to a memorable cast of characters including Betty Eisner a psychologist who drew on her own experience to argue for the therapeutic potential of LSD and Timothy Leary who founded the Harvard Psilocybin Project and went on to become psychedelics most famous advocate Hartogsohn chronicles these developments in the context of the era's cultural trends including the cold war the counterculture the anti psychiatric movement and the rise of cybernetics Drawing on insights from the study of science technology and society he develops the idea of LSD as a suggestible technology the properties of which are shaped by suggestion He proposes the concept of collective set and setting arguing that the historical and sociocultural context of midcentury America offered a particular set and setting creating the conditions for what he calls the American trip *Dr. Dobb's Journal*, 2005 **ALICE'S ADVENTURES IN WONDERLAND** GRANDMA'S
