## What Is The Scope For Paper 1 In Afrikaans:

The scope of lexical rules M. Moortgat, H. v. d. Hulst, T. Hoekstra, 2020-10-26 No detailed description available for The scope of lexical rules *Controlled Natural Language* B. Davis, C.M. Keet, A. Wyner, 2018-09-12 Controlled natural languages CNLs are based on natural language and apply restrictions on vocabulary grammar and or semantics They fall broadly into 3 groups Some are designed to improve communication for non native speakers of the respective natural language in others the restrictions are to facilitate the use of computers to analyze texts for example to improve computer aided translation and a third group of CNLs are designed to enable reliable automated reasoning and formal knowledge representation from seemingly natural texts This book presents the 11 papers selected from 14 submitted and delivered at the sixth in the series of workshops on Controlled Natural Language CNL 2018 held in Maynooth Ireland in August 2018 The papers cover a full spectrum of controlled natural languages ranging from human oriented to machine processable controlled languages and from more theoretical results to interfaces reasoning engines and the real life application of CNLs The book will be of interest to all those working with controlled natural language whatever their approach **The Calendar** University of South Africa, 1992 *Structure Preserved* C. Jan-Wouter Zwart, Mark de Vries, 2010 Structure is at the rock bottom of all explanatory sciences Jan Koster Forty years ago the hypothesis that underlying the bewildering variety of syntactic phenomena are general and unified structural patterns of unexpected beauty and simplicity gave rise to major advancements in the study of Dutch and Germanic syntax with important implications for the theory of grammar as a whole Jan Koster was one of the central figures in this development and he has continued to explore the structure preserving hypothesis throughout his illustrious career This collection of articles by over forty syntacticians celebrates the advancements made in the study of syntax over the past forty years reflecting on the structural principles underlying syntactic phenomena and emulating the approach to syntactic analysis embodied in Jan Koster's teaching and research **Theoretical Approaches to Disharmonic Word Order** Theresa Biberauer, Michelle Sheehan, 2013-11 This title considers whether any generalisations can be made about word order in language The chapters written by international scholars draw on data from several disharmonic and typologically distinct languages including Mandarin Chinese Basque French English Hixkaryana a Cariban language Khalkha Mongolian Uyghur Turkic and Afrikaans Resources in Education, 2001-10 **Assessing Academic Literacy in a Multilingual Society** Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students

from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience      Youth and Popular Culture in Africa Paul Ugor,2021 The edited collection focuses on the links between young people and African popular culture It explores popular culture produced and consumed by young people in contemporary Africa And by culture we mean all kinds of texts or representations visual oral written performative fictional social and virtual created by African youth mostly about their lives and their immediate societies and for themselves but also consumed by the larger public and shared locally and globally We proceed from the premise that cultural texts not only function as social facts as Karin Barber argues but that they double as commentaries upon and interpretations of social facts They are part of social reality but they also take up an attitude to social reality 2007 04 So the work focuses specifically on what African youth produce as popular culture under what conditions or contexts they produce such work how they produce those texts why they produce them the aesthetic dimensions of these texts as cultural artifacts and why these textual practices matter as social facts as interpretive acts and as cultural symbols of the general cultural activism of young people in a rapidly changing world a world where the global cultural economy is the prime terrain for the relentless struggles over the meanings that come to shape political economic and social systems      *Triggers* Anne Breitbarth,Henk van Riemsdijk,2008-08-22 The concept of trigger is a core concept of Chomsky s Minimalist Program The idea that certain types of movement are triggered by some property of the target position is at least as old as the notion that the movement of noun phrases to the subject position is triggered by their need to receive nominative case In more recent versions of syntactic theory triggering mechanisms are thought to regulate all of movement Furthermore a quite narrow range of triggering mechanisms is permitted As is to be expected such a restrictive approach meets a variety of difficulties Specifically the question is whether all triggering elements required to cover displacement of all kinds in natural language can be independently motivated Further how can a trigger theory which crucially relies on the idea that all movement is obligatory deal with apparently optional movement processes Are features an adequate means to express the triggering function in all cases More radically are all movement phenomena really the result of the checking of trigger features And what about apparent triggering factors that are external to syntax such as prosody can they be captured in a rigid trigger theory In other words could certain aspects of triggered movement be due to interface conditions Such is the range of questions addressed by the fourteen contributions to this book They cover a considerable range of languages including Afrikaans Breton Bulgarian Dutch English French German Gungbe Hungarian Italian Japanese Kiswahili Romanian These papers present materials both empirical and theoretical that will not fail to have considerable impact on the further development of the concept of trigger in syntactic theory      The Construal of Space in Language and Thought Martin Pütz,René Dirven,2011-07-11 No detailed description available for The Construal of Space in Language and Thought

**Issues in Formal German(ic) Typology** Werner Abraham, C. Jan-Wouter Zwart, 2002 This book takes up a variety of general syntactic topics which either yield different solutions in German in particular or which lead to different conclusions for theory formation One of the main topics is the fact that languages that allow for extensive scrambling between the two verbal poles V 2 and V last need to integrate discourse functions like thema and rhema into the grammatical description This is attempted in terms of Minimalism thus extending the functional domain Special attention is given to the asymmetrical scrambling behavior of indefinites vs definites and their semantic interpretation Related topics are Transitive expletive sentences types of existential sentences with either BE or HAVE the that trace phenomenon and its semantics negative polarity items ellipsis and gapping passivization double negation all of which have extensive effects both on distributional behavior and semantic disambiguation reaching far beyond effects observable in English with its rigid unscramble word order Focus on South Africa

Vivian de Klerk, 1996-02-23 This volume brings together a range of studies on various aspects of English and its use in Southern Africa Experts in their field have written chapters on topics including the history and development of English in South Africa the characteristics of particular pan ethnic varieties of English which have evolved in South Africa including black Indian and colored varieties as well as the unique features of the English of South Africa's southern neighbours Swaziland Zimbabwe Zambia and Malawi Other contributions focus on English in relation to issues such as standardisation lexicography education language planning language attitudes and interaction patterns The book will be of primary interest to students of linguistics and language but should also be relevant to educationists sociologists and historians *Catalog of the Melville J. **Arguments and Structure** Teun Hoekstra, 2008-08-22 This book contains 14 articles by Teun Hoekstra 1953 1998 on core issues in syntactic theory Some articles focus on the structure of DP others on the structure of the sentence as a whole while others still deal explicitly with the parallels between the two The papers are distributed over four sections Argument structure T chains The morpho syntax of verbal and nominal projections and Small clauses More than half of the articles in this book are published here for the first time or appear for the first time in English Hoekstra's work is characterized by a fundamental interest in the central questions of syntactic theory most notably the relation between argument structure and X bar structure This concentrated interest led to a deep understanding of the notion of transitivity with respect to both the status of the external argument and that of the internal argument where status refers to both the content and the licensing In this collection of papers Hoekstra reports on his insights in these matters As far as content and licensing of the external argument is concerned this collection contains papers on the relation between passives and their active counterparts the parallels between possessives and transitives and the differences and similarities between past participles and infinitives As to the internal argument we find papers addressing sentential complementation verbal affixation and resultatives And there

is a whole section on tense and its role in keeping the sentence together One of the papers in this collection is Hoekstra's classic but hitherto unpublished *Small clauses everywhere* more than 70 pages which summarizes Hoekstra's views on such issues as resultatives particle verbs and double object constructions Monthly Catalog of United States Government Publications United States. Superintendent of Documents, 1952 February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications September issue includes List of depository libraries June and December issues include semiannual index *The Composition of Meaning* Alice ter Meulen, Werner Abraham, 2004-10-31 In the modular design of generative theory the syntax semantics interface has accounted all along for meanings at the level of Logical Form The syntax pragmatics interface on the other hand is the result of what one may call the pragmatic turn in the linguistic theory where content is partitioned into given and new information In other words the structural division of the clause has been subjected to criteria of information or discourse structure Both interfaces require a structurally descriptive inventory whose specific shapes can be motivated on theory internal grounds only The present collection of original articles develops the concept of these interfaces further The papers in the first section focus on the syntax semantics interface those in the second section on the syntax pragmatics interface On Record Schalk van der Merwe, 2017-07-12 Popular Afrikaans music artists have done well in post apartheid South Africa and enjoy the enthusiastic support of loyal fans This support is fuelled by a complex set of emotions linked to being Afrikaans in a culturally pluralistic society In *On Record* van der Merwe investigates the interplay between popular music and the unfolding of Afrikaans culture politics from the start of the twentieth century to the present It includes a search for the earliest recorded Afrikaans songs and documents subsequent phases of music development that reflect the agency of ordinary individuals artists and listeners against a background of fundamental societal and political change It regards both the music mainstream and the alternative and reveals among other things historical cases of compliance and resistance regarding the master narrative of Afrikaner nationalist ideology the attempts by cultural entrepreneurs to establish authority over popular Afrikaans culture class tension lasting racial exclusivity protest and censorship and the post apartheid invocation of Afrikaner nostalgia and white victimhood Ultimately *On Record* provides an uninterrupted account and a critique of the entire history of recorded popular Afrikaans music up to the present *Sign Language Research Sixty Years Later: Current and Future Perspectives* Valentina Cuccio, Erin Wilkinson, Brigitte Garcia, Adam Schembri, Erin Moriarty, Sabina Fontana, 2022-11-14 **Nuclear Science Abstracts**, 1975

**Further investigations into the nature of phrasal compounding** Carola Trips, Jaklin Kornfilt, 2017 This collection of papers on phrasal compounding is part of a bigger project whose aims are twofold First it seeks to broaden the typological perspective by providing data for as many different languages as possible to gain a better understanding of the phenomenon itself Second based on these data which clearly show interaction between syntax and morphology it aims to discuss theoretical models which deal with this kind of interaction in different ways Models like Generative Grammar assume

components of grammar and a clear cut distinction between the lexicon often including morphology and grammar Other models like construction grammar do not assume such components and are rather based on a lexicon including constructs A comparison of these models on the basis of this phenomenon on the morphology syntax interface makes it possible to assess their descriptive and explanatory power
