Plant Life Cycle

All living things have a life cycle. A life cycle is the stages of development and growth living things go through. This is a life cycle of a plant.

The Water Cycle

Water travels in a cycle. It is on a continuous journey from the sky to land and back again.

Moon Phases

The moon travels around the earth. As the moon travels it goes through different phases. There are 8 different moon phases that reflect the amount of sunlight reflecting off the moon. It takes one month for the moon to go through all of its phases.

Force & Motion

Force is the energy it takes to do work. When you push or pull on an object it takes energy to get that object to move. Motion is the change in position an object experiences because of a force applied.

Electrical Circuits

Electrical energy is from the flow of moving electrons. Electrons move through a path called a circuit. Electrical energy can produce other forms of energy such as light, sound, and heat.

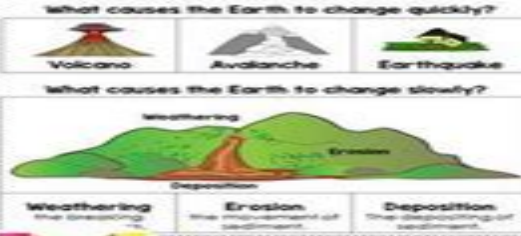

Landforms

Over time, the shape of the land and water on Earth has changed. These changes have resulted in the formation of different landforms.

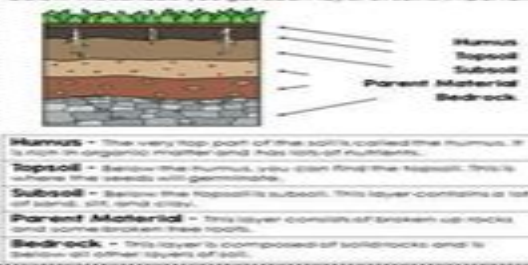

Changes to the Earth's Surface

The Earth's surface can change quickly due to a natural disaster, or it can change slowly over time due to natural forces.

Layers of Soil

Soil has many layers. The top layer is called the topsoil, but the profile of soil changes drastically the deeper below the surface you go. Each layer of soil is important.

Animal Traits

All animals have their own set of traits, characteristics and behaviors. Some of these traits and behaviors are inherited and some of them are learned.
