Neoliberalism Economic Policy and the Collapse of the Public Sector Lionel D. Lyles PhD.,2018-07-13 My book demonstrates how classical liberalism was the foundation upon which Thomas Jefferson George Washington Alexander Hamilton and others wrote the Declaration of Independence Constitution and the Bills of Rights however it was rolled back by 1980 and replaced with neoliberalism which was championed by the Reagan Administration In short this ideology has one main aim and that is to shrink government cut the budgets of social programs and give away billions of taxpayer dollars to private business in the form of tax breaks During the Jindal administration and by the end of its first term more than 7 billion worth of tax breaks had been given away to private business A surplus of 1 billion left in the Louisiana treasury by outgoing governor Kathleen Blanco after Hurricane Katrina was given away by the end of the first two months of its first term Today the Louisiana legislature is currently facing a 650 million fiscal cliff and no doubt more budget cuts are in store for the Louisiana public sector

Turning the Page Rachel Slaughter,2021-03-05 There is a dearth of multicultural literature in schools since few schools offer a curriculum that promotes multicultural education However by the year 2050 ethnic minority children will make up the majority of the United States public school classrooms Multicultural literature is the building block of a multicultural education which reflects our nation s diversity and helps all students learn by providing help to bridge the cultural gap and promote racial awareness

Teachers often find it difficult to identify or find quality multicultural literature that adheres to the standard curriculum. Turning the Page: The Ultimate Guide for Teachers to Multicultural Literature helps educators find and evaluate multicultural books that are suitable for the classroom and align with the standard curriculum. The book includes a peer-reviewed metric that shows teachers how to substitute biased books with multicultural literature that endorses the same themes. Second, the book includes reviews, lesson plans, and curated book lists of multicultural books. Finally, the book offers a stepwise plan on how to create a task force of school stakeholders who can implement a comprehensive multicultural program. In 2018, The National Association for Multicultural Education released standards for multicultural education to encourage school staff to become culturally competent and linguistically diverse. Turning the Page: The Ultimate Guide for Teachers to Multicultural Literature moves educators in that direction.

Archaeological Narratives of the North American Great Plains Sarah J. Trabert, Kacy L. Hollenback, 2021-08-12. Stretching from Canada to Texas and the foothills of the Rockies to the Mississippi River, the North American Great Plains have a complex and ancient history. The region has been home to Native peoples for at least 16,000 years. This volume is a synthesis of what is known about the Great Plains from an archaeological perspective, but it also highlights Indigenous knowledge, viewpoints, and concerns for a more holistic understanding of both ancient and more recent pasts. Written for readers unfamiliar with archaeology in the region, the book in the SAA Press Current Perspectives Series emphasizes connections between past peoples and contemporary Indigenous nations, highlighting not only the history of the area but also new theoretical understandings that move beyond culture history. This overview illustrates the importance of the Plains in studies of exchange, migration, conflict, and sacred landscapes, as well as contact and colonialism in North America. In addition, the volume includes considerations of federal policies and legislation, as well as Indigenous social movements and protests over the last hundred years, so that archaeologists can better situate Indigenous heritage, contemporary Indigenous concerns, and lasting legacies of colonialism today.

New Methods and Theories for Analyzing Mississippian Imagery Bretton T. Giles, Shawn P. Lambert, 2021-10-19. Mitten,2017-06-20 Derived from the renowned multi volume International Encyclopaedia of Laws this practical analysis of sports law in the United States deals with the regulation of sports activity by both public authorities and private sports organizations The growing internationalization of sports inevitably increases the weight of global regulation yet each country maintains its own distinct regime of sports law and its own national and local sports organizations Sports law at a national or organizational level thus gains a growing relevance in comparative law The book describes and discusses both state created rules and autonomous self regulation regarding the variety of economic social commercial cultural and political aspects of sports activities Self regulation manifests itself in the form of by laws and encompasses organizational provisions disciplinary rules and rules of play However the trend towards more professionalism in sports and the growing economic social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities This form of regulation appears in a variety of legal areas including criminal law labour law commercial law tax law competition law and tort law and may vary following a particular type or sector of sport It is in this dual and overlapping context that such much publicized aspects as doping sponsoring and media and responsibility for injuries are legally measured This monograph fills a gap in the legal literature by giving academics practitioners sports organizations and policy makers access to sports law at this specific level Lawyers representing parties with interests in the United States will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative sports law *The Louisiana School for Math, Science, and the Arts* Dr. Bill Ebarb,2015-12-16 The Louisiana School was created by state law to challenge

Place, Race, and Identity Formation Ed Douglas McKnight, 2017-04-07 In this work of curriculum theory Ed Douglas McKnight addresses and explores the intersections between place with specific discussion of Kincheloe s and Pinar s conceptualization of place and identity and race specifically Winthrop Jordan s historical analysis of race as an Anglo European construction that became the foundation of a white mythos To that end he employs a form of narrative construction called curriculum vitae course of life a method of locating and delineating identity formation which addresses how theories of place race and identity formation play out in a particular concrete life By working through how place racializes identity and existence the author engages in a long Southern tradition of storytelling but in a way that turns it inside out Instead of telling his own story as a means to romanticize the sins of the southern past he tells a new story of growing up within the white discourse of the Deep South in the 1960s and 70s tracking how his racial identity was created and how it has followed him through life Significant in this narrative is how the discourse of whiteness and place continues to express itself even within the subject position of a curriculum theorist teaching in a large Deep South university The book concludes with an elaboration on the challenges of engaging in the necessary anti racist complicated conversation within education to begin to work through and cope with heavy racialized inheritances
