critiqued in this case for overlooking the negative consequences of failed cooperative endeavours The book highlights the importance of trust and compliance in the success of cooperative agreements as well as the adverse effects of their breakdown The work contributes significantly to our understanding of international relations in the Middle East It draws on an extensive examination of prior research while presenting novel theoretical insights The detailed case study of Iran s nuclear aspirations before during and after the nuclear deal serves as a compelling application of the theoretical framework Finally the book provides an in depth exploration of the intricate web of geopolitics trust and cooperation that has shaped the trajectory of Iran s nuclear ambitions It offers not only theoretical contributions to the field of international relations but also valuable policy insights for managing this critical international issue      Acting Alone Bradley F. Podliska, 2010-03-16 Acting Alone A Scientific Study of American Hegemony and Unilateral Use of Force Decision Making is a straight forward analysis of unilateral U S military actions which are dependent upon the power disparity between the U S and the rest of the world In solving the puzzle as to why individual presidents have made the wrong decision to act alone the author lays out a president s behavior during a crisis as a two step decision process Acting Alone reviews the well studied first decision deciding to use force based on international conflict literature and organized along traditional lines The author then details the second decision deciding to use unilateral force with an explanation of the criticisms of multilateralism and the reasons for unilateralism To test a new theory of unilateral use of force decision making Acting Alone devises a definition and coding rules for unilateral use of force develops a sequential model of presidential use of force decision making and constructs a new alternative measure of military power a Composite Indicator of Military Revolutions CIMR It then uses three methods a statistical test with a heckman probit model an experiment and case studies to test U S crisis behavior since 1937 By applying these three methods the author finds that presidents are realists and make expected utility calculations to act unilaterally or multilaterally after their decision to use force The unilateral decision in particular positively correlates with a wide military gap with an opponent an opponent located in the Western hemisphere and a national security threat      *Rivalry and Alliance Politics in Cold War Latin America* Christopher Darnton, 2014-06-30 The success or failure of foreign policy initiatives in Latin America is heavily influenced by bureaucratic and military background players Rivalry and Alliance Politics in Cold War Latin America Christopher Darnton s comparative study of the nature of conflict between Latin American states during the Cold War provides a counterintuitive and shrewd explanation of why diplomacy does or doesn t work Specifically he develops a theory that shows how the parochial interests of state bureaucracies can overwhelm national leaders foreign policy initiatives and complicate regional alliances His thorough evaluation of several twentieth century Latin American conflicts covers the gamut of diplomatic disputes from border clashes to economic provocations to regional power struggles Darnton examines the domestic political and economic conditions that contribute either to rivalry continued conflict or rapprochement diplomatic reconciliation while assessing the impact of U S foreign policy Detailed case studies

provide not only a robust test of the theory but also a fascinating tour of Latin American history and Cold War politics including a multilayered examination of Argentine Brazilian strategic competition and presidential summits over four decades three rivalries in Central America following Cuba's 1959 revolution and how the 1980s debt crisis entangled the diplomatic affairs of several Andean countries These questions about international rivalry and rapprochement are of particular interest to security studies and international relations scholars as they seek to understand what defuses regional conflicts creates stronger incentives for improving diplomatic ties between states and builds effective alliances The analysis also bears fruit for contemporary studies of counterterrorism in its critique of parallels between the Cold War and the Global War on Terror its examination of failed rapprochement efforts between Algeria and Morocco and its assessment of obstacles to U S coalition building efforts

**Prince: The Making of a Pop Music Phenomenon** Stan Hawkins, Sarah Niblock, 2016-04-08 The career of the prolific pop artist Prince has become inextricably intertwined with the history of popular music since the late 1970s This multi instrumental icon who remains one of the highest grossing live performers in America has been called a genius for his musicianship composition and incredible performances But Prince holds iconic status for more than his music Best known for his racial blurring and extravagant sexual persona Prince's music and visual iconography has always chimed with the ambiguity of subjectivity at any given moment Prince the sign offers a space for fans to evaluate and reconfigure their attitudes towards their own identities and towards their position as subjects within the socio cultural sphere This much needed interdisciplinary analysis is the first of its kind to examine critically Prince's popular music performances sounds lyrics and the plethora of accompanying visual material such as album covers posters fashions promotional videos and feature films Specifically the book explores how and why he has played such a profoundly meaningful and significant role in his fans lives
