India Ujjwal Kumar Singh, Anupama Roy, 2019-08-09 As the constitutional body that conducts elections the Election Commission of India ECI has emerged as a trusted institution within the shared space of democracy in India This process has however been a fraught one because of contestation over the ECI's constitutional responsibility and the power of Parliament to make laws to govern electoral matters This comprehensive monograph discusses the history of the ECI through a study of the measures it has adopted to ensure certainty of procedures in order to maintain the democratic uncertainty of electoral outcome In this context innovations such as the Model Code of Conduct have enhanced the rule making powers of the ECI Going beyond the ECI's design and performance framework Singh and Roy argue that changes in the nature of electoral contests and domination of political regimes have made the task of preserving electoral integrity and assuring its deliberative content a challenging one

Building an Inclusive Mexico Policies and Good Governance for Gender Equality

OECD, 2017-01-10 This review looks at gender equality in Mexico examining what advancement has already been made and exploring what needs to be done to close existing gender gaps in political social and economic life and promote real social change

The Personalization of Politics in the European Union Katjana Gattermann, 2022 The personalization of politics whereby politicians increasingly become the main focus of political processes is a prominent phenomenon in modern democracies that has received considerable scholarly attention in national politics However little is known about the scope causes and consequences of personalization in European Union politics although recent institutional and political developments suggest that such a trend is underway This book sheds light onto this phenomenon by taking a comprehensive approach to understanding four key dimensions of personalization concerning institutions media politics and citizens In doing so it relies on an innovative longitudinal and cross country comparative research design and applies multiple methods It argues that institutional personalization is a necessary but not sufficient pre condition for media to increasingly report about individual politicians It shows that media personalization fluctuates across country and over time while Members of the European Parliament increasingly engage in personalized legislative and communicative behaviour These developments are conditional upon domestic media and electoral systems and have limited effects on citizen attitudes and political awareness The book concludes that as additional political actors gain formal individual responsibilities European Union politics also becomes more complex to disentangle Ultimately institutions provide more effective cues than individual politicians both for media to inform citizens about European Union politics and for the latter to acquire information that may help them understand and evaluate European Union politics These findings have important implications for the future of personalized politics in the European Union

New Opposition in the Middle East Dara Conduit, Shahram Akbarzadeh, 2018-09-27

This book uses a Contentious Politics lens to examine patterns of contestation since 2009 and 2011 among the Middle East's most important opposition actors The volume is comprised of seven chapters that ask questions in relation to the responsiveness of opposition groups to their political environments the long term legacies of authoritarianism and whether

the post 2009 2011 political environment is better or worse for Middle Eastern oppositions It interrogates the ways in which oppositions have morphed in relation to this changed operating environment subjectively interpreting the costs and benefits of contestation in order to maximise political opportunities To some oppositions changes in the power balance between regime structures and opposition agents led to unprecedented opportunity for political action while for others structures were galvanised to restrict opposition activities In total the volume shows that even though the Arab Uprisings and Green Movement achieved few of their overt goals the events unleashed smaller shifts across the region that have led to a fundamental change in the politics of contestation amongst the region's oppositions These patterns echo experiences in other parts of the world including the coloured revolutions in post Soviet states and the political environment in Chile after Pinochet

Strengthening Electoral Integrity Pippa Norris, 2017-08-29 Today a general mood of pessimism surrounds Western efforts to strengthen elections and democracy abroad If elections are often deeply flawed or even broken in many countries around the world can anything be done to fix them To counter the prevailing ethos Pippa Norris presents new evidence for why programs of international electoral assistance work She evaluates the effectiveness of several practical remedies including efforts designed to reform electoral laws strengthen women's representation build effective electoral management bodies promote balanced campaign communications regulate political money and improve voter registration Pippa Norris argues that it would be a tragedy to undermine progress by withdrawing from international engagement Instead the international community needs to learn the lessons of what works best to strengthen electoral integrity to focus activities and resources upon the most effective programs and to innovate after a quarter century of efforts to strengthen electoral integrity

Beneficial Insects David V. Alford, 2019-04-23 Insects are key components of life on our planet and their presence is essential for maintaining balanced terrestrial ecosystems Without insects humans would struggle to survive and on a world scale food production would be severely compromised Many plants and animals depend directly or indirectly on insects for their very survival and this is particularly so in the case of insectivorous birds and other such creatures The beneficial role of insects is often overlooked or misunderstood and in farming circles their very presence on crops is often seen to be unwelcome In reality however many insects are genuinely beneficial as in the case of parasitic and predacious species The use of chemical pesticides to control crop pests is becoming more tightly regulated and environmentally undesirable and low input farming in which natural enemies of pests are encouraged to survive or increase is becoming far more prevalent Accordingly Integrated Pest Management IPM and Integrated Pest Management ICM strategies are increasingly being developed advocated and adopted Features Highlights information on many groups of insects and mites that act as natural enemies or biological control agents of phytophagous insects and mites including plant pests Profusely illustrated with high quality colour photographs Focuses mainly on insects and mites as natural enemies of plant pests including parasitic and predacious species that have been accidentally or deliberately introduced in classical biological

control programmes Reviews the role of phytophagous European insects and mites in controlling or managing European plants that have become invasive weeds in other parts of the world notably North America Australia and New Zealand
