

1 INTRODUCTION

1.1 Purpose of the CT Study Instruction Manual

The purpose of this instruction manual is to help you complete original and revised CT studies for your treatment plant using the CT Template.

1.2 What Systems Can Use the New Automated CT Study Template?

The Template is primarily intended for small and medium size treatment plants. The template is designed for treatment plants with no more than 10 disinfection zones, each zone consisting of no more than 10 treatment units. If your plant does not meet these requirements, your CT study will need to be completed manually.

1.3 How Is This Instruction Manual Organized?

Table 1-1 gives a summary of the chapters in this manual and what they cover.

Table 1-1: CT Study Template Guidance Manual Chapters

Chapter	Topics
1	Introduction This chapter describes who is eligible to use the new Template and discusses how to use this guidance manual.
2	CT Studies and the CT Study Approval Letter This chapter details the concepts used in the preparation of a CT Study and the subsequent approval process. A firm understanding of the background presented here is critical to the preparation of an accurate CT Study.
3	Describing Your Treatment Plant This chapter presents the guidelines you will use follow in writing a narrative description and preparing a plant schematic.
4	Describing Your Disinfection Zones This chapter takes you through the steps involved with customizing the Template to accurately reflect the number of disinfection zones and treatment units in your treatment plant. This chapter outlines the information you must enter to characterize your disinfection process.
5	Evaluating Your Disinfection Protocol Chapter 5 describes the Calculator worksheet of the CT Study Template and the information you must provide to determine whether your disinfection process provides adequate disinfection.
6	Submitting Your CT Study Report This chapter presents the steps involved with submitting your complete CT Study Report to the TCEQ.

Generating Natural Language Descriptions With Integrated Text and Examples Vibhu O. Mittal,2022-11-30 This book discusses issues in generating coherent effective natural language descriptions with integrated text and examples This is done in the context of a system for generating documentation dynamically from the underlying software representations Good documentation is critical for user acceptance of any complex system Advances in areas such as knowledge based systems natural language and multimedia generation now make it possible to investigate the automatic generation of documentation from the underlying knowledge bases This has several important benefits it is always accessible it is always

current because the documentation reflects the underlying representation and it can take the communication context such as the user into account The work described in this book compiles results from cognitive psychology and education on effective presentation of examples as well as work on computational generation of examples from intelligent tutoring systems It also takes into account computational learning from examples and a characterization of good examples for just this purpose Issues arising from these research areas as well as issues coming from the author's own corpus analysis of instructional and explanatory texts are discussed in the context of generating natural language descriptions of software constructs A text planner is used for a hierarchy of communicative goals Examples are treated as an integral part of the planning process and their interaction with text is represented at all stages The strengths and limitations of this approach are also discussed Although the focus of this book is the generation of natural language descriptions a similar set of issues need to be addressed in the generation of multimedia descriptions This book will be of interest to all researchers working in the areas of natural language interfaces intelligent tutoring systems documentation and technical writing and educational psychology
