Advances in Surgical and Medical Specialties Raj Bawa, 2023-07-14 The pace and sophistication of advances in medicine in the past two decades have been truly breathtaking This has necessitated a growing need for comprehensive references that highlight the current issues in specific sectors of medicine Keeping this in mind each volume in the Current Issues in Medicine series is a stand alone text that provides a broad survey of various critical topics in a focused area of medicine all accomplished in a user friendly yet interconnected format However unlike other series on medicine or medical texts this series focuses on current trends perspectives and issues in medicine that are central to healthcare delivery in the 21st century Medical practitioners today continue to improve upon techniques and technologies to provide procedures for patients that are safer faster less invasive and more accurate a direct consequence of advances in technological breakthroughs from a variety of medical and engineering fields In order to render modern patient care it is imperative that surgeons and medical practitioners stay current with these latest advances in their respective specialties Given this backdrop the specific topics covered in this volume and the expertise of the contributing authors accurately reflect the rapidly evolving areas within surgical and medical specialties While recognising how expansive and multifaceted medicine is Advances in Surgical and Medical Specialties addresses crucial recent advances in surgical and medical specialties integrating the knowledge and experience of experts from academia and practicing surgeons The multidisciplinary approach reflected here makes this volume a valuable reference resource for medical practitioners medical students nurses fellows residents undergraduate and graduate students educators venture capitalists policymakers and biomedical researchers A wide audience will benefit from having this volume on their bookshelf health care systems the pharmaceutical industry academia and government

**HIV and Aging** M. Brennan-Ing, R. F. DeMarco, 2016-11-22 Despite decades of attention on building a global HIV research and programming agenda HIV in older populations has generally been neglected until recently This new book focuses on HIV and aging in the context of ageism with regard to prevention treatment guidelines funding and the engagement of communities and health and social service organizations The lack of perceived HIV risk in late adulthood among older people themselves as well on the part of providers and society in general has led to a lack of investment in education testing and programmatic responses Ageism perpetuates the invisibility of older adults and in turn renders current medical and social service systems unprepared to respond to patients needs While ageism may lead to some advantages discounts for services for example it is the negative aspects that must be addressed when determining the appropriate community level response to the epidemic

**Drugs and Public Health in Post-Soviet Central Asia** Muyassar Turaeva, 2022-08-27 The book outlines post Soviet style of health management in Central Asia Regional studies on Central Asia to date have focused on states politics religion and inter ethnic relations but not on the health system within the region Soviet style policies have also covered only other aspects relevant for the region This book highlights the public health situation of the region with a focus on drug abuse HIV AIDS in the context of increased mobility and drug trafficking routes

which became even more porous after the break up of the Soviet Union Based on a qualitative study the empirical data in the book was collected during long term fieldwork conducted in Uzbekistan and Turkmenistan in 2010 2011 as well as shorter stays in Uzbekistan between 2012 2016 The analysis of the empirical material largely draws on the works of Foucault particularly his concept of biopolitics when analyzing Soviet style health management that is still practiced in the region Applying the Foucauldian genealogical method this study has been structured to trace the genealogy of epidemics to understand the historical path of drug abuse in the region as well as the discursive genealogy of drug politics and drug abuse Applying the same genealogical method of Foucault the formative and discursive trajectory of the institution of Uchyot was traced to contextualize the health governance methods that have historical legacy of Soviet style governance and control of the total population Drugs and Public Health in Post Soviet Central Asia Soviet Style Health Management is a unique resource for academic specialists practitioners professionals and advanced undergraduate and graduate students in public health as well as a range of scholars and professionals in sociology political science anthropology and anyone with an interest in the Central Asia region drug addiction or HIV The book also could appeal to international donors in the field of HIV drug addiction who are working in the region
