Underestimated Mary Marantz, 2025-04-29 It's all been done I can't start until it's perfect What if the critics come What if I start and then can't follow through What if my voice doesn't matter What if I don't actually matter What if it's already too late Sound familiar Do you find that year after year you stay stuck in the same tired broken scripts fear uses on all of us It's time for a wake up call Because so often when faced with the choice between creating nothing and creating failure we choose nothing Another year goes by The clock goes on ticking And the world is worse for our absence It's time to move from stuck to start This book does the heavy lifting to dismantle all the lies fear uses move you out of an endless spiral of your own excuses not to mention other people's opinions and bring you right up to a threshold of no return this place where we become people who feel the fear and move forward anyway With equal parts powerful prose and tactical action steps Underestimated will become the essential go to field guide for anyone who is ready to once and for all quit playing small

Geoethics S. Peppoloni, G. Di Capua, 2015-08-24 This Special Publication will be an important tool for geoscientists aimed at increasing the awareness of their societal role and responsibility in conducting education research and practice activities What are the responsibilities of a geoscientist And what motivations are needed to push geoscientists to practice the Earth sciences in an ethical way The major environmental challenges affecting human communities require not only a strictly scientific and technical preparation by the geoscientists but also a reflection on their broader obligations towards society It is important that geoscientists consider geoethics as an indispensable framework on which to base their training and activity The principles of geoethics can guide them to pursue the common good by weighing the benefits and costs of each choice and identifying eco friendly and society friendly solutions that guarantee the respect of the right balance between human life and the dynamics of the Earth Communication and dissemination of geosciences should become core activities in building a knowledge based society which is able better to protect itself and the Earth ecosystems in order to guarantee a life in harmony with our planet for future generations *Evaluation of Optical Instruments for Real-time Continuous Monitoring of Smoke Particulates*, 2000 *Psychological Review* James Mark Baldwin, James McKeen

the English speaking world His innovative writings theorize and ultimately embrace the epochal shift that humanity is undergoing from what he termed linear thinking based on writing toward a new form of multidimensional visual thinking embodied by digital culture For Flusser these new modes and technologies of communication make possible a society the telematic society in which dialogue between people becomes the supreme value The first English language anthology of Flusser s work this volume displays the extraordinary range and subtlety of his intellect A number of the essays collected here introduce and elaborate his theory of communication influenced by thinkers as diverse as Martin Buber Edmund Husserl and Thomas Kuhn While taking dystopian posthuman visions of communication technologies into account Flusser celebrates their liberatory and humanizing aspects For Flusser existence was akin to being thrown into an abyss of absurd experience or bottomlessness becoming human required creating meaning out of this painful event by consciously connecting with others in part through such technologies Other essays present Flusser s thoughts on the future of writing the revolutionary nature of photography the relationship between exile and creativity and his unconventional concept of posthistory Taken together these essays confirm Flusser s importance and prescience within contemporary philosophy
