*Unlocking the chains of knowledge* Monwabisi K Ralarala, Suren Pillay, Zannie Bock, Russell H. Kaschula, 2025-02-28 Unlocking the chains of knowledge Understanding the challenges

remaking pedagogies and curriculum renewal addresses the complex yet imperative task of reshaping the colonial legacy embedded within South African higher education and beyond. The book confronts the historical and ideological bindings that have entrenched European centric knowledge within the fabric of academia in Africa propelling a transformative journey within the Arts and Humanities. At its core, this work presents a tripartite focus: firstly understanding the deep seated issues ingrained in the traditional university structure; secondly remaking pedagogical practices; and lastly renewing the curriculum. Recognising the historical dominance of Eurocentric ideas, the book explores various movements, theories and practices from negritude to postcolonial theory, aiming to emancipate and amplify the voices and knowledge of those historically excluded. With a commitment to a pluralistic approach, the book scrutinises the power dynamics of language, the importance of diverse perspectives, and the challenging task of inclusion without replicating the divisive structures of the past.

**Prof Christine Winberg**, Research Chair in Work Integrated Learning, Cape Peninsula University of Technology, In *Unlocking the chains of knowledge: Understanding the challenges remaking pedagogies and curriculum renewal*, the editors provide a decisive and detailed reflection and profound understanding of complexities of knowledge generation in Southern Africa. Unlike many volumes that address these intricate complexities, this volume not only navigates the intricate complexities of the long history of epistemic injustices and intolerance in the Southern African higher education environment but delves deeper into the core of what is required for curriculum transformation and renewal. The groundbreaking volume addresses the urgent need for linguistic inclusivity, consciousness about decoloniality, as well as embedding social justice in South African and Zimbabwean education, and by doing so, presents strategies that can be used by the rest of the African continent in addressing the scourge of coloniality.

**Prof Pamela Maseko**, Executive Dean, Faculty of Humanities, Nelson Mandela University, **Sociology in South Africa**. R. Sooryamoorthy, 2016-08-13. This book is the first comprehensive account of the history and current state of South African sociology. Providing a holistic picture of the subject both as it is taught in universities and as a field of research, it reveals the trajectories of a discipline in a challenging socio-political context. With the support of historical and scientometric data, it demonstrates how the changing political situation from colonialism to apartheid to democracy has influenced the nature, direction and foci of sociological research in the country. The author shows how during the apartheid era, sociology was professionally fragmented and divided along language and race lines. It was, however, able to flourish with the advent of democracy in 1994 and has become a unique academic movement. This insightful work will appeal to students and scholars of the social sciences and all those interested in the history and society of South Africa.

**Examining Information Literacy in Academic Libraries** Chizwina, Sabelo, Moyo, Mathew, 2024-04-09. In the 21st century, information literacy emerges as the cornerstone of educational development. Despite its paramount significance, a stark reality persists: students often traverse the corridors of academia without acquiring essential information literacy skills. This deficiency is exacerbated by a shortage of faculty training, leaving academic libraries to shoulder the responsibility of cultivating information savvy individuals.

Examining Information Literacy in Academic Libraries delves into the core challenges and solutions surrounding this critical educational imperative. This book illuminates the role of academic libraries as bastions of information literacy instruction. The capacity of students and information consumers to seek, evaluate, and utilize information is paramount for informed decision making, ethically and legally. Regardless of whether or not students were brought up in the digital age, many lack the fundamental information literacy skills required for higher education. This deficiency manifests in academic malpractices such as plagiarism, which compromise the integrity of educational institutions. Moreover, this imperative work contends that the Fourth Industrial Revolution (4IR) is not a distant concept but a present reality. The recent global upheaval caused by the Coronavirus pandemic accelerated the adoption of new technologies, necessitating a swift reassessment of our collective ability to navigate this everchanging digital and information landscape. Focusing on media literacy, data literacy, and digital literacy with information literacy as the overarching domain, this book serves as a beacon for educators, librarians, and policymakers.
