Understanding Capitalism Samuel Bowles, Richard Edwards, Frank Roosevelt, 2005 Understanding Capitalism third edition provides an introduction to economics with extensive attention to the global economy inequality the information revolution the exercise of power and the historical evolution of economic institutions and individual preferences

Understanding Capitalism Samuel Bowles, Richard Edwards, 1985 Understanding capitalism Samuel Bowles, Richard Edwards, **The capitalist mode of destruction** Costas Panayotakis, 2021-02-09 The capitalist mode of destruction traces contemporary capitalism's economic ecological and democratic crises Combining insights from a range of disciplines including psychology sociology and political economy Panayotakis interprets these crises as manifestations of a previously unrecognized contradiction over time the benefits of capitalism's technological dynamism tend to decline even as its threats to humanity and the planet continue to mount To explain this contradiction the book analyzes the production and distribution of surplus in capitalist societies and rethinks the concept of surplus itself Identifying the public sector and households as sites of production no less important than the workplace this book attributes capitalism's contradictions to working people's lack of control over the surplus they produce This lack of control is undemocratic and threatens the planet Only a classless society in which working people democratically determine the size and use of the surplus they produce can effectively respond to our current predicament Recognizing such a democratic classless society as the essence of the communist ideal the book argues that far from becoming obsolete this ideal is ever more indispensable But since the necessity of this ideal does not guarantee its realization the book also investigates the conditions necessary for the formation of an anti capitalist alliance for social justice democracy and ecological sustainability Three Worlds of Labour Economics Garth L. Mangum, P. Philips, 2016-07-08 First Published in 1988 More than ever before the economics profession is divided among three competing schools of thought Especially in labor economics neoclassical institutional and radical perspectives contend each approaching its analysis of issues from different world views and separate sets of assumptions This book presents four issues in labor economics income distribution racial discrimination comparable worth and the international division of labor **Levels of Socio-economic Development Theory** David Jaffee, 1998-07-30 Advanced undergraduates graduate students and social scientists interested in a wide ranging but concise review of contemporary theories of social and economic development will find this second edition invaluable The coverage spans the disciplines of sociology psychology economics political science political economy geography and management The theories are organized by level of analysis individual organizational societal and international to provide the reader with a larger organizational scheme in which to understand the theoretical explanations and arguments and to emphasize the importance of developing linkages among the different levels Some of the new topics discussed include globalization transnational organizational structures debt the transition from socialism to capitalism and

human development **When Ads Work** John Philip Jones, 2007 The accepted wisdom in advertising is that ad campaigns are good for building brand recognition and good will but not for immediate sales impact When Ads Work argues the opposite that well planned and well executed advertising campaigns can and should have an immediate impact on sales Featuring numerous examples from recent ad campaigns the new edition of this popular book is a model for any successful advertising research program With a device he calls STAS Short Term Advertising Strength a measure of the immediate effect of advertising on sales the author demonstrates th The Morality of Radical Economics Ron P. Baiman, 2016-08-31 This book is in equal parts a treatise on morality and economics a critique of neoclassical orthodoxy a brief for replacing mainstream economics with a radical political economics and an argument for the abandonment of neoliberal capitalism in favor of democratic socialism It includes a detailed proposal for a demand and cost alternative to supply and demand analysis and an in depth technical critique of both neoclassical high theory and applied microeconomic analysis demonstrating that these are not only infeasible or immoral but have directly contributed to public policy disasters Further the book suggests that only a moral economics in the form of radical political economy can address the looming economic and environmental crises of today s world Baiman begins with an introduction to morality and ethics in both general sciences and in economics in particular He then guides readers through evidence of how neoclassical economics has not only failed to remain objective and value free but has become an ideology of apologetics protecting an immoral system In addition to breaking down real world examples to demonstrate his assertions Baiman analyzes a theoretical Utopia design exercise He concludes by arguing that the only form of economics that supports widely shared human values such as social equity democracy and solidarity is so called radical economics and that all true economics science should be directed toward achieving more socially productive economic activity An invaluable guide to morality and economics this book will appeal to researchers and teachers looking to change the way we think about economics policy and society Creating a New World Economy Gerald Epstein, 2009-01-30 Twenty five economists set out the challenges posed by a global economy **Radical Political Economy: A Concise Introduction** Charles A. Barone, 2015-03-26 This straightforward introduction to radical political economy strikes a balance between breadth and depth and was written for the beginning student and others interested in a relatively short text on radical economics **Progress or Collapse** Roberto De Vogli, 2013-01-03 Human progress is heading toward collapse There are converging ecological crises looming on the horizon climate change peak oil water shortages fish depletion and food scarcities The world is on a collision course against the limits of the ecosystem Modern societies are consuming polluting and growing as if there is no tomorrow Indeed there may not be one In Progress or Collapse Roberto De Vogli guides us through the multiple converging global crises of economic progress He explores the connections between the environmental crisis and the psychological social cultural political and economic emergencies affecting modern societies It is not a coincidence the author argues that global ecological destruction is occurring in tandem with other crises rising mental

disorders mindless consumerism rampant conformism status competition civic disengagement startling social inequalities global financial instability and widespread political impasse In this hard hitting analysis Roberto De Vogli identifies the root cause of all these symptoms of societal breakdown neoliberalism defined as market greed He argues that in recent decades modern societies have been dominated by a suicidal economic doctrine based on two articles of faith the greed creed and the market God The greed creed states that people are nothing but selfish profiteers in a perpetual search for status and wealth The market God is the belief that all societal and human affairs are best regulated as market exchanges What is to be done Can we stop progress toward collapse Given the current distribution of power and wealth and the state of psychological and political inertia in which we are trapped our chances of redefining progress around alternative values and embracing a new philosophy of life are slim Yet the history of human emancipation has often been shaped by giant leaps forward In the past civic struggles have overcome the limits of the possible Whether this will happen again in the future is the central question of our time This book will be of interest to researchers and students of ecology psychology public health epidemiology human development political philosophy economics sociology and politics *The Microeconomics Anti-Textbook* Rod Hill, Tony Myatt, 2021-12-02 Mainstream textbooks present economics as an objective science free from value judgements The Microeconomics Anti Textbook demonstrates this to be a myth one which serves to make such textbooks not only off puttingly bland but also dangerously misleading in their justification of the status quo and neglect of alternatives In this fully updated and expanded edition of their celebrated book Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way before presenting an anti text analysis and critique Challenging the assumptions arguments and models Hill and Myatt provide the essential guide to decoding the textbooks and show that real economics is far more interesting and subversive than the simplistic version presented to students *Democracy, Liberalism, and War* Tarak Barkawi, Mark Laffey, 2001 Commencing with Susan Sontag's line that the only worthwhile answers are those that blow up the questions ten contributions by UK and US academics critique the democratic peace DP prescription for inter state peace of just add liberal democracy Contextualizing the DP literature historically and internationally they call for reassessment of the complex inter relationships among democracy liberalism and war in the global revolution provide a table summarizing war and democracy by world order periods and identify directions for future research Based on US workshops in 1998 and 2000 Barkawi and Laffey are lecturers in international relations the former at the U of Wales Aberystwyth and the latter at the U of London Political Economy Barry Clark, 2016-03-21 This nontechnical book provides a comprehensive and interdisciplinary survey of political economy that can easily be understood by any reader with an introductory level background in economics As 21st century political debate becomes polarized across ideological lines students and citizens need to understand the underlying values on which contending arguments are based The current political gridlock calls for a deeper appreciation of the competing perspectives in political economy Now revamped for a third edition Political Economy

A Comparative Approach supplies a truly interdisciplinary examination of the development and evolution of political economy from the Enlightenment onward drawing material from the realms of political theory sociology philosophy and history as well as from economics to present detailed comparisons of competing perspectives on a variety of current issues The book begins with an introduction to political economy that provides readers with an overview of the historical development of the discipline followed by in depth analyses of four ideological perspectives in political economy Classical Liberalism Radicalism Conservatism and Modern Liberalism The author then applies each of the four ideological perspectives to a range of contemporary issues such as the role of government economic instability poverty labor relations discrimination education culture the environment and international trade Readers will gain insight into the methods and practice of political economics as well as better understand the history of political economic thought and the effects of historical processes European industrialization for example on modern debates

The Rhetoric of the New Political Documentary Thomas W Benson, Brian J Snee, 2008-05-23 The Rhetoric of the New Political Documentary explores the most visible and volatile element in the 2004 presidential campaign the partisan documentary film This collection of original critical essays by leading scholars and critics including Shawn J and Trevor Parry Giles Jennifer L Borda and Martin J Medhurst analyzes a selection of political documentaries that appeared during the 2004 election season The editors examine the new political documentary with the tools of rhetorical criticism combining close textual analysis with a consideration of the historical context and the production and reception of the films The essays address the distinctive

rhetoric of the new political documentary with the films typically having been shot with relatively low budgets in video and using interviews and stock footage rather than observation of uncontrolled behavior The quality was often good enough and interest was sufficiently intense that the films were shown in theaters and on television which provided legitimacy and visibility before they were released soon afterwards on DVD and VHS and marketed on the Internet The volume reviews such films as Michael Moore's Fahrenheit 9/11 two refutations of Moore's film Fahrenhype 9/11 and Celsius 41/11 Unprecedented The 2000 Presidential Election and George W Bush Faith in the White House films that experimented with a variety of angles and rhetorics from a mix of comic disparagement and earnest confrontation to various emulations of traditional news and documentary voices The Rhetoric of the New Political Documentary represents the continued transformation of American political discourse in a partisan and contentious time and showcases the independent voices and the political power brokers that struggled to find new ways to debate the status quo and employ surrogate independents to create a counterrhetoric
