Transdisciplinary Solutions for Sustainable Development Mark Charlesworth, 2015-05-15. Global environmental issues such as climate change and species loss are intensifying despite our best efforts to combat them. The key reason for this is that the drivers of these problems are closely linked to the industrialism and consumerism that are promoted by governments and other organizations the world over. This innovative book identifies the key issues that block progress in sustainable development and proposes transdisciplinary solutions. Presenting a review of the epistemology and ethics of this policy field including current policy responses, it examines the ethical and policy implications from a multidisciplinary perspective. The book explains the current limitations of scientific prediction for global environmental issues and develops innovative approaches to respond to these difficulties, drawing out lessons that will make sustainable development policy more democratic, plural, and open. This book will be of great interest to students and researchers in environmental policy, development studies, politics, economics, and sustainable development.

Physics, Volume Two: Chapters 18-32 John D. Cutnell, Kenneth W. Johnson, 2014-12-15. Cutnell and Johnson has been the 1st text in the algebra-based physics market for almost 20 years. The 10th edition brings on new co-authors David Young and Shane Stadler, both out of LSU. The Cutnell offering now includes enhanced features and functionality. The authors have been extensively involved in the creation and adaptation of valuable resources for the text. This edition includes chapters 18-32.

Earth Observation Science and Applications for Risk Reduction and Enhanced Resilience in Hindu Kush Himalaya Region Birendra Bajracharya, Rajesh Bahadur Thapa, Mir A. Matin, 2021-08-14. This open access book is a consolidation of lessons learnt and experiences gathered from our efforts to utilise Earth observation (EO) science and applications to address environmental challenges in the Hindu Kush Himalayan region. It includes a complete package of knowledge on service life cycles including multi-disciplinary topics and practically tested applications for the HKH. It comprises 19 chapters drawing from a decade's worth of experience gleaned over the course of our implementation of SERVIR HKH, a joint initiative of NASA, USAID, and ICIMOD to build capacity on using EO and geospatial technology for effective decision making in the region. The book highlights SERVIR's approaches to the design and delivery of information services in agriculture and food security, land cover and land use change, and ecosystems, water resources, and hydro-climatic disasters and weather and climate services. It also touches upon multidisciplinary topics such as

service planning gender integration user engagement capacity building communication and monitoring evaluation and learning We hope that this book will be a good reference document for professionals and practitioners working in remote sensing geographic information systems regional and spatial sciences climate change ecosystems and environmental analysis Furthermore we are hopeful that policymakers academics and other informed audiences working in sustainable development and evaluation beyond the wider SERVIR network and well as within it will greatly benefit from what we share here on our applications case studies and documentation across cross cutting topics
