The International Journal of Indian Psychology, Volume 4, Issue 1, (No. 79) IJIP.In,2016-12-01 [The Method of Multiple Hypotheses](#) Charles S. Reichardt,2021-10-20 This book illustrates the method of multiple hypotheses with detailed examples and describes the limitations facing all methods including the method of multiple hypotheses as the means for constructing knowledge about nature Author Charles Reichardt explains the method of multiple hypotheses using a range of real world applications involving the causes of crime traffic fatalities and home field advantage in sports The book describes the benefits of utilizing multiple hypotheses and the inherent limitations within which all methods must operate because all conclusions about nature must remain tentative and forever subject to revision Nonetheless the book reveals how the method of multiple hypotheses can produce strong inferences even in the face of the inevitable uncertainties of knowledge The author also explicates some of the most foundational ideas in philosophy of science including the notions of the underdetermination of theory by data the Duhem Quine thesis and the theory ladenness of observation This book will be important reading for advanced undergraduates graduates and professional researchers across the social behavioral and natural sciences wanting to understand this method and how to apply it to their field of interest [Questioning Causality](#) Rom Harré,Fathali M. Moghaddam,2016-01-25 Covering a topic applicable to fields ranging from education to health care to psychology this book provides a broad critical analysis of the assumptions that researchers and practitioners have about causation and explains how readers can improve their thinking about causation In virtually every laboratory research center or classroom focused on the social or physical sciences today the concept of causation is a core issue to be questioned tested and determined Even

debates in unrelated areas such as biology law and philosophy often focus on causality What made that happen In this book experts from across disciplines adopt a reader friendly approach to reconsider this age old question in a modern light defining different kinds of causation and examining how causes and consequences are framed and approached in a particular field Each chapter uses applied examples to illustrate key points in an accessible manner The contributors to this work supply a coherent critical analysis of the assumptions researchers and practitioners hold about causation and explain how such thinking about causation can be improved Collectively the coverage is broad providing readers with a fuller picture of research in social contexts Beyond providing insightful description and thought provoking questioning of causation in different research areas the book applies analysis of data in order to point the way to smarter more efficient practices Consequently both practitioners and researchers will benefit from this book INTERNATIONAL JOURNAL OF INDIAN PSYCHOLOGY Prof. Suresh Makvana,Dr. Ankit Patel,2019-03-25

Citizenship in Motion Hazama, Itsuhiro, Umeya, Kiyoshi, 2019-04-22 Anthropological reflections on citizenship focus on themes such as politics ethnicity and state management Present day scholarship on citizenship tends to problematise unsettle and contest often taken for granted conventional connotations and associations of citizenship with imagined culturally bounded political communities of rigidly controlled borders This book the result of two years of research conducted by South African and Japanese scholars within the framework of a bilateral project on citizenship in the 21st century contributes to such ongoing efforts at rethinking citizenship globally and as informed by experiences in Africa and Japan in particular Central to the essays in this book is the concept of flexible citizenship predicated on a recognition of the histories of mobility of people and cultures and of the shaping and reshaping of places and spaces and ideas of being and belonging in the process The book elucidates the contingency of political membership relationship between everyday practices and political membership and how citizenship is the mechanism for claiming and denying rights to various political communities Self requires others to construct itself a reality that is subject to renegotiation as one continues to encounter others in a world characterised by myriad forms of interconnecting mobilities both global and local Citizenship is thus to be understood within a complex of power relationships that include ones formed by laws and economic regimes on a local scale and beyond Citizenship in Africa Japan and indeed everywhere is best explored productively as lying between the open ended possibilities and tensions interconnecting the global and local
