Building Adaptation James Douglas, 2006-08-11 As existing buildings age nearly half of all construction activity in Britain is related to maintenance refurbishment and conversions Building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry Given its importance to sustainable construction the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future especially in the developed parts of the world Building Adaptation Second Edition is intended as a primer on the physical changes that can affect older properties It demonstrates the general principles techniques and processes needed when existing buildings must undergo alteration conversion extension improvement or refurbishment The publication of the first edition of Building Adaptation reflected the upsurge in refurbishment work The book quickly established itself as one of the core texts for building surveying students and others on undergraduate and postgraduate built environment courses This new edition continues to provide a comprehensive introduction to all the key issues relating to the adaptation of

buildings It deals with any work to a building over and above maintenance to change its capacity function or performance

Global Mandatory Fair Use Tanya Aplin, Lionel Bently, 2020-11-05 In a path breaking work Tanya Aplin and Lionel Bently make the case that the quotation exception in Article 10 of the Berne Convention constitutes a global mandatory fair use provision It is global they argue because of the reach of Berne qua Berne and qua TRIPS and its mandatory nature is apparent from the clear language of Article 10 and its travaux It relates to use that is not limited by type of work type of act or purpose and it is fair use because the work must be made available to the public with attribution and the use must be proportionate and consistent with fair practice By explaining the contours of global mandatory fair use and thus displacing the three step test as the dominant international copyright norm governing copyright exceptions this book creates new insights into how national exceptions should be framed and interpreted

Perspectives On Western Art Linnea Wren, 2018-02-22 This anthology of readings related to Western art history explains specific works of art illustrated in Janson's History of Art and De la Croix and Tansey's Gardner's Art Through the Ages in terms of the ideas beliefs and concerns of the people and cultures who created the art It brings a new understanding of art because it shows the social and cultural basis of major works of art through history The ten sections are Ancient Near East Egyptian Aegean Greek Etruscan Roman early Christian Byzantine and Islamic early Medieval Romanesque and Gothic The readings have been drawn from many areas of intellectual and social history including religion philosophy literature science economics and law Each selection is preceded by an introductory note which discusses the readings in terms of its subject and theme its source and usage and its relevance to the study of the work of art

History of Art Horst Woldemar Janson, Anthony F. Janson, 2004 For forty years this widely acclaimed classic has remained unsurpassed as an introduction to art in the Western world boasting the matchless credibility of the Janson name This newest update features a more contemporary more colorful design and vast array of extraordinarily produced illustrations that have become the Janson hallmark A narrative voice makes this book a truly enjoyable read and carefully reviewed and revised updates to this edition offer the utmost clarity in contributions based on recent scholarship Extensive captions for the book's incredible art program offer profound insight through the eyes of twentieth century art historians speaking about specific pieces of art featured throughout Significantly changed in this edition is the chapter on The Late Renaissance in which Janson offers a new perspective on the subject tracing in detail the religious art tied to the Catholic Reform movement whose early history is little known to many readers of art history Janson has also rearranged early Renaissance art according to genres instead of time sequence and he has followed the reinterpretation of Etruscan art begun in recent years by German and English art historians With a truly humanist approach this book gives written and visual meaning to the captivating story of what artists have tried to express and why for more than 30 000 years

Walter Frazier Kim Coventry, Arthur H. Miller, 2009 [Renaissance And Renascences In Western Art](#) Erwin Panofsky, 2018-05-04 Renaissance and Renascences in Western Art spans the period from the 10th to the 15th century

including discussion of the Carolingian renaissance and the 12th century proto renaissance Erwin Panofsky posits that there were renaissances prior to the widely known Renaissance that began in Italy in the 14th century Whereas earlier renaissances can be classified as revivals the Renaissance was a unique instance that led to a wider cultural transformation *China's Christianity*, 2017-04-24 Among the assumptions interrogated in this volume edited by Anthony E Clark is if Christianity should most accurately be identified as Chinese when it displays vestiges of Chinese cultural aesthetics or whether Chinese Christianity is more indigenous when it is allowed to form its own theological framework In other words can theological uniqueness also function as a legitimate Chinese Christian cultural expression in the formation of its own ecclesial identity Also central to what is explored in this book is how missionary influences consciously or unconsciously introduced seeds of independence into the cultural ethos of China's Christian community Chinese girls who pushed the limits of proper behaviour for example added to the larger sense of confidence as China's Christians began to resist the model of Christianity they had inherited from foreign missionaries Contributors are Robert E Carbonneau CP Christie Chui Shan Chow Amanda C R Clark Lydia Gerber Joseph W Ho Joseph Tse hei Lee Audrey Seah Jean Paul Wiest and Xiaoxin Wu **Livability and Sustainability of Urbanism** Bagoes Wiryomartono, 2019-07-09 This book is a fascinating wide reaching interdisciplinary examination of urbanism in the context of humanities and social sciences research comprising cutting edge theoretical and empirical investigations of urban livability and sustainability Urban livability is explored as a phenomenon of happenings that gather people things and domains in the specific spatiotemporal context of the city this context is the life world of urbanism Meanwhile sustainability is conceived of as the capacity of urbanism that enables people to cultivate their sociocultural and economic existence and development without the depletion of their current resources in the future In this study phenomenology is uniquely incorporated as a way of seeing things according to their presence in space and time **Arm Assembly Language - An Introduction (Second Edition)** J. R. Gibson, 2011 An introductory text describing the ARM assembly language and its use for simple programming tasks **Railway Depots, Stations & Terminals** Brian Solomon, 2015-10 Ride the rails with famed railroad historian Brian Solomon and learn about the incredible architecture and history of stations across America **Daidalos at Work** Clairly Palyvou, 2018-12-31 This is primarily a book on architecture and as such it seeks to bring forward the deeper forces that guide the work of all the sons and all the daughters of Daidalos Architecture is the protagonist whereas the prehistoric time of this architecture is as important as any other historical time This book is firmly based on the realities of a long silenced world available to us today through the agency of archaeology In that sense it addresses archaeologists architectural historians and architects alike in the hope that it will prove useful to those interested in understanding the Minoan world through its architecture as much as those interested in exploring architecture through the Minoan paradigm This dual goal emanates from my deep belief in the timeless and universal values of architecture As a teacher of history of architecture the challenge has been to bring history into the studios where future

architecture is formulated to engage history in the discourse on current architectural ethos and practices and to show that an analytical and critical approach to the past is a potent tool for advancing architectural awareness and educating future architects I am equally confident that such an approach will return its benefits back to history for it will provide new tools of thought and methods of interpretation of the relics of the past Having set the scope of this book it is only fair to add what is not included in its goals the reader will not find a descriptive account of Minoan buildings and sites nor a list of the major architectural achievements in chronological order This is due not only to the enormous amount of relevant information that has been accumulated to date but also to an altogether different interest in the subject as described above Time however is crucial We have a mental need to grasp that we are rooted in the continuity of time and in the man made world it is the task of architecture to facilitate this experience Pallasmaa 2005b 32 Time related issues therefore such as permanence and change or tradition and innovation will concern us

Better By Design? Paul L. Knox, 2020-10 The design professions architecture city planning landscape architecture and urban design share a great deal in terms of intellectual antecedents professional ideals and praxis In particular they share a commitment to creating better cities whether at the scale of buildings neighborhoods or city regions But who decides what constitutes a good city and how should such an ideal be implemented In *Better by Design* Paul Knox explores the intellectual roots of the design professions showing how architects planners and other designers have traditionally interpreted their roles and implemented their ideas in cities across North America and the UK Drawing on his long record of research and award winning publications on the social production of the built environment Knox offers a critical appraisal of their ultimate effectiveness in achieving the goal of creating and sustaining good cities
