Une Victime Improbable:

Immigration and Criminal Law in the European Union Elspeth Guild, Paul Minderhoud, 2006-06-01 This is a study of the legal framework on criminal measures on trafficking and or smuggling and facilitating illegal entry in six Member States France Germany Italy the Netherlands Spain and the UK and the European Union This issue is at the nexus of migration and criminal law The system of criminal law in the Member States is a central part of the balance of the powers of the authorities and the rights of the citizen The way in which civil liberties of the individual are weighed in comparison with public protection duties by the authorities is in essence a constitutional issue The treatment of foreigners in particular as regards their entry onto the territory and residence is not part of the constitutional settlements but a field governed by state discretion and exceptionalism The rules and administrative measures regarding entry residence and expulsion of foreigners is not subject to the same civil liberties guarantees of due process as apply in criminal law This comparative study examines how in each Member State the insertion of immigration into criminal law takes place Do the rules of criminal law in respect of due process take precedence over the lower evidential and procedural requirements which are applied in the field of immigration How does the criminal justice system deal with this new field where central constitutional issues are not present There are two levels on which the insertion of immigration into criminal law takes place the legal and the social This book deals with both On the one hand it looks at the laws and the court decisions on criminal trials in respect of immigrants for immigration related offences on the other hand it looks at how the society political actors media interest groups etc discuss and develop this issue This book is designed for policymakers academics students and activists concerned about the European Union

Social Movement Studies in Europe Olivier Fillieule, Guya Accornero, 2016-03-01 Bringing together over forty established and emerging scholars this landmark volume is the first to comprehensively examine the evolution and current practice of social movement studies in a specifically European context While its first half offers comparative approaches to an array of significant issues and movements its second half assembles focused national studies that include most major European states Throughout these contributions are guided by a shared set of historical and social scientific questions with a particular emphasis on political sociology thus offering a bold and uncommonly unified survey that will be essential for scholars and students of European social movements The Empire of Trauma Didier Fassin, Richard Rechtman, 2009-07-26 This work shows how during the 20th century the perspective on victims of trauma shifted from suspicion to recognition From these ethnographical fieldworks the authors thus propose a broader perspective on the political and moral issues of contemporary societies **Haitian laughter** Georges Anglade, 2006 A Mosaic of Ninety Miniatures in French and English translated from the French by Anne Pease McConnell Haitian Laughter is constructed around the lodyans a narrative genre that has blossomed in Haiti as an art of miniatures The substantial reduction in scale that presides over their creation allows only the significant features to remain like a medieval illumination a Japanese bonsai or simply a small sized map of an immense

territory This makes each miniature a dwarf sized saga which lets us glimpse the larger dimension of the original of which it is a reduced model Bilingual French and English

Peter Burgess, 2021-11-18 This book presents an original interdisciplinary approach to the study of the so called recovery phase in disaster management centred on the notion of repairing The volume advances thinking on disaster recovery that goes beyond institutional and managerial challenges descriptions and analyses It encourages socially politically and ethically engaged questioning of what it means to recover after disaster At the centre of this analysis contributions examine the diversity of processes of repairing through which recovery can take place and the varied meanings actors attribute to repair at different times and scales of such processes It also analyses the multiple arenas juridical expert political in which actors struggle to make sense of the what ness of a disaster and the paths for recovery These struggles are interlinked with interest based and power based struggles which maintain structural inequality and exploitation existing social hierarchies and established forms of marginality The work uses case studies from all over the world cutting edge theoretical discussions and original empirical research to put critical and interpretative approaches in social sciences into dialogue opening the venue for innovative

Jasper, Michael P. Young, Elke Zuern, 2020 Heroes villains victims and minions have been the building blocks of moral and political reputations throughout human history In Public Characters the authors look at visual images music and words to show the techniques by which these characters get constructed They also trace the impact of these public characters in politics including the 2016 triumph of Donald J Trump through his ability to cast opponents as villains and minions *Autonomous Vehicles and the Law* Gilles Pillet, 2025-05-20 The development of autonomous vehicles requires all the countries of the world to adapt their respective legal systems The scale and complexity of the task is daunting The law is called upon to enable and even encourage the advent of this revolution while guaranteeing a fair allocation of the resulting risks and ensuring public safety What's more the law must rise to this challenge at a time when it is impossible to predict in the medium term the speed at which autonomous vehicles will enter circulation or even their degree of autonomy Adapting civil liability law appears to be the key to success Faced with the peculiarities of autonomous vehicles many concepts on which current liability regimes are based will need rethinking For instance the complex manufacturing of driving systems multiplies the number of potential liable parties and the black box effect associated with the operation of learning AI increases the burden of proof in the event of a failure **Le manuel de réanimation, soins intensifs et médecine d'urgence** Jean-Louis Vincent, 2006-06-28 Cette troisième édition propose une actualisation complète des données de 2005 Chaque chapitre a entièrement été revu et complété par l'auteur et de nouvelles illustrations ont été ajoutées L'esprit didactique et pratique a été conservé afin d'en rendre l'accès aisé aux jeunes médecins passant par une unité de réanimation aux urgentistes ou encore aux médecins assurant des gardes dans les hôpitaux *Mam'zelle Tout-le-Monde* Léopold Stapleaux, 1886 *Papers and Transactions* Joseph Jacobs, Alfred Trübner Nutt, 1892 **Conflict of Interest and Medicine** Boris Hauray, Henri Boullier, Jean-Paul Gaudillière, Hélène Michel, 2021-09-06 In the context of a growing criticism on the influence of the pharmaceutical industry on physicians scientists or politicians Conflict of Interest and Medicine offers a comprehensive analysis of the conflict of interest in medicine anchored in the social sciences with perspectives from sociology history political science and law Based on in-depth empirical investigations conducted within different territories France the European Union and the United States the contributions analyze the development of conflict of interest as a social issue and how it impacts the production of medical knowledge and expertise physicians work and their prescriptions and also the framing of health crises and controversies In doing so they bring a new understanding of the transformations in the political economy of pharmaceutical knowledge the politicization of public health risks and the promotion of transparency in science and public life Complementing the more normative and quantitative understandings of conflict of interest issues that dominate today this book will be of interest to researchers in a broad range of areas including social studies of sciences and technology sociology of health and illness and political sociology and ethics It will be also a
