This book brings together 34 expert Australian practitioners and researchers to provide a comprehensive, authoritative, up-to-date and stimulating perspective on sexual health. In numerous and significant ways, the book differs from its predecessor volume published in 2005. Chapters are now grouped into five parts: Sexual health in Australia; Foundations for sexual health; Sexual health in clinical practice; Sexual health in specific populations; and Prevention and promotion. All original chapters have been thoroughly reviewed and updated. Six new chapters are included on: Sexual health in society; Contraception and options for unintended pregnancy; The legal environment of sexual healthcare practice; Lesbian, gay, bisexual and transgender people; Health promotion and Prevention strategies. Chapters on sexual health in adolescence and in older adults have been expanded. A section on refugees is now included with sections on homeless youth, sex workers and prisoners in a chapter on the sexual health of other vulnerable populations. This book is one-third longer than its predecessor volume. For tertiary level students of nursing, medicine, public health, health promotion and sexology, this new book will continue to be an ideal textbook. For healthcare practitioners working in reproductive health, sexual health, maternal and child health and many other specialist fields, it will be an invaluable first reference.
