Toward an Integrated Science of Wellbeing Elizabeth Rieger, Robert Costanza, Ida Kubiszewski, Paul Dugdale, 2023-05-19 There has always been interest in understanding what constitutes the good life and the basis for creating it Much has been written about health and wellbeing from the perspectives of diverse disciplines such as psychology

medicine economics social science ecology and political science However the interconnections between these perspectives have received far less attention In *Toward an Integrated Science of Wellbeing* the contributing authors connect these diverse perspectives and consider the interconnections between the psychological human biological societal and environmental domains of wellbeing This integrated approach offers a first step toward a more complete understanding of wellbeing that can propel wellbeing research and initiatives in novel and fruitful directions Music Education, Ecopolitical

Professionalism, and Public Pedagogy Margaret S. Barrett, Heidi M. Westerlund, 2024-01-01 This book challenges the dominant expertise professionalism rationale for music education by responding to the call to develop ecological awareness at a time when all professions have a moral obligation to place sustainable and interdependent life at the center The book aims to expand music education's professional horizons to acknowledge the responsibility of the music field to contribute to the demands of complex questions of sustainability and identify the ways in which sustainable music education may be strengthened through an activist relational ecological stance It suggests a radical moral turn by asking What if music education is recognised as part of the problem of sustaining unsustainability and What if music teacher education was developed in and through dialogue with a futures perspective These questions are interrogated through a critical analysis of the historical positioning of music in education and an interdisciplinary application of theories of ecology and professionalism

Interactive Media for Sustainability Roy Bendor, 2018-08-02 *Interactive Media for Sustainability* presents a conceptually rich critical account of the design and use of interactive technologies to engage the public with sustainability Treating interactive technologies as forms of mediation the book argues that these technologies advance multiple understandings of sustainability At stake are the ways sustainability encodes the complexity of interrelated social and natural systems and how it conveys the malleability of the future The book's argument is anchored in a diverse set of theoretical resources that include contemporary work in human computer interaction HCI social theory media studies and the philosophy of technology and is animated by a variety of examples including interactive simulations persuasive apps digital games art installations and decision support tools **Transforming Food Systems** Molly D. Anderson, 2024-07-04 This book focuses on the contested nature and competing narratives of food system transformations despite it being widely acknowledged that changes are essential for the safeguarding of human and planetary health and well being The book approaches food system

transformation through narratives or the stories we tell ourselves and others about how things work Narratives are closely connected with theories of change although food system actors frequently lack explicit theories of change Using political economy and systems approaches to analyze food system transformation the author focuses on how power in food systems manifests and how this affects whom can obtain healthy and culturally appropriate food on a reliable basis Among the narratives covered are agroecology food sovereignty and technological innovation The book draws on interviews and recorded speeches by a broad range of stakeholders including international policymakers philanthropists academics and

researchers workers in the food and agricultural industries and activists working for NGOs and social movements In doing so it presents contrasting narratives and their implicit or explicit theories of change This approach is vitally important as decisions made by policymakers over the next few years based on competing narratives will have a major influence on who will eat what how food will be produced and who will have a voice is shaping food systems The overarching contribution of this book is to point toward the most promising pathways for achieving sustainable food systems and refute pathways that show little hope of achieving a more sustainable future This book will be of great interest to students scholars and policymakers interested in creating a sustainable food system which will ensure a food secure socially just and environmentally sustainable future

Overcoming Environmental Risks to Achieve Sustainable Development Goals Tamie Nakajima, Keiko Nakamura, Keiko Nohara, Akihiko Kondoh, 2021-11-18 This thought provoking book examines how the accumulated knowledge on past and present environmental issues and risks within Japan can be applied in order to help deliver the transformation to a sustainable and well being society The book opens with a series of case analyses on environmental pollution events and pollution related diseases within the country over the past half century or more Lessons

learned regarding the harm to society are highlighted. Diverse current environmental issues are then explored in detail ranging from the management of hazardous chemical and asbestos exposure to marine plastic pollution and nuclear disasters. This discussion forms the basis for the final part of the book which focuses on how progress can be made towards the Sustainable Development Goals set out in the United Nations 2030 Agenda for Sustainable Development. Important insights are also provided into future directions in human ecology and ecotoxicology. The book will be a valuable resource for both new and established researchers as well as for those seeking comprehensive information on environmental occupational health and health promotion.

Routledge Handbook of Sustainable Diets Kathleen Kevany, Paolo Prosperi, 2022-12-30. This handbook presents a must-read comprehensive and state-of-the-art overview of sustainable diets, an issue critical to the environment and the health and well-being of society. Sustainable diets seek to minimise and mitigate the significant negative impact food production has on the environment. Simultaneously, they aim to address worrying health trends in food consumption through the promotion of healthy diets that reduce premature disability, disease and death. Within the Routledge Handbook of Sustainable Diets, creative, compassionate, critical and collaborative solutions are called for across nations, across disciplines and sectors. In order to address these wide-ranging issues, the volume is split into sections dealing with environmental strategies, health and well-being, education and public engagement, social policies and food environments, transformations and food movements, economics and trade, design and measurement mechanisms and food sovereignty. Comprising contributions from up-and-coming and established academics, the handbook provides a global, multi-disciplinary assessment of sustainable diets, drawing on case studies from regions across the world. The handbook concludes with a call to action which provides readers with a comprehensive map of strategies that could dramatically increase sustainability and help to reverse global warming, diet-related non-communicable diseases and oppression and racism. This decisive collection is essential reading for students, researchers, practitioners and policymakers concerned with promoting sustainable diets and thus establishing a sustainable food system to ensure access to healthy and nutritious food for all. A New Gender Equality Contract for Europe Andrea Pető, Laetitia Thissen, Amandine Clavaud, 2024-11-04. This open access book, supported by FEPS and Fondation Jean Jaurès, centres on the work of contemporary progressive feminist thinkers and the idea that there is no democracy without gender equality. The authors develop the concept of a feminism that works for everyone regardless of their gender, social or cultural identity in the context of EU policy. The book features gender experts with multidisciplinary backgrounds from across Europe, providing a comprehensive exploration of efforts to move away from gender backlash rhetoric and towards a new gender contract for a fairer, more equal European Union.
